agriculture to ecotourism is a natural fit because many of those who are engaged in agriculture have extensive knowledge of plants and animals that can be utilized by the ecotourism industry The use of ecotourism as a development strategy is distinctive For ecotourism to succeed it must preserve the natural environment but it must do so in a way that does not preclude growth in other sectors of the economy Miller shows how the successful pursuit of foreign direct investment coupled with Costa Rica's immense biodiversity and its attractiveness to tourists is key to understanding the success of the Costa Rican economy Many of the preferences that ecotourists have for a vacation destination also help create an amenable atmosphere for business These factors include political and social stability high quality of life low levels of corruption economic freedom high levels of education and a suitable infrastructure The most important part of this research is its development of strategies based upon the Costa Rican model that would be useful for other states in the region When looking at whether states can replicate the development strategy of Costa Rica environmental sustainability is an important concern

identifies factors affecting the appropriateness success and sustainability of ecotourism in MPAs and highlights research and practice priorities in the future Also summarised in this book are the documented impacts of recreational uses on the coastal marine environment of the Mediterranean These range from the impact of recreational boating on seagrass meadows the effects of scuba diving on hard sessile benthic invertebrates and the possible disturbance of marine mammals by whale and dolphin watching activities Other chapters in this book analyse the current state of the art of ecotourism in Cameroon an overview of present status quo of ecotourism and its educational activities with its utilisation of wild animals in Japan the effects of coastal ecotourism and water quality in the Yucatan Peninsula and the impact of tourism management on a population of infant monkeys The findings suggest that tourism leads to high levels of stress aggression and infant loss at this site Several recommendations are offered to minimise harmful effects to help ensure that natural behavioural patterns are fostered
