Encountering Gorillas James L. Newman, 2013-07-05 Gorillas the largest of the apes inhabiting our planet have been a source of fear awe and inspiration to humans In this book James L Newman brings a lifetime of study of Africa to his compelling story of the rich and varied interaction between gorillas and humans since earliest contact He illuminates the complex relationship over time through the interlinked themes of discovery exploitation understanding and continuing survival Tragically the number of free living gorillas facing habitat loss disease and poaching has declined dramatically over the course of the past century and the future of the few that remain is highly uncertain At the same time those in zoos and sanctuaries now lead much more secure lives than they did earlier Newman follows this transition highlighting the roles played by key individuals both humans and gorillas Among the former have been adventurers opportunists writers and scientists The latter include real gorillas such as Gargantua and Koko and fictional ones notably King Kong and Mighty Joe Young This thoughtful and engaging book helps us understand how our image of gorillas has been both distorted and clarified through culture and science for centuries and how we now control the destiny of these magnificent great apes

A Naturalist and Other Beasts George B. Schaller, 2010-05-04 Since the 1950s eminent field biologist George Schaller has roamed through many lands observing wild animals and conducting landmark long term studies that have deepened our understanding of these creatures He has reported and reflected on his work in classic much acclaimed books including The Last Panda and National Book Award winner The Serengeti Lion but much of his

best writing has been ephemeral published in magazines only to drop out of sight This collection features 19 short pieces brought together in book form to offer a unique overview of his life in the field Chapters describe stalking tigers in India and jaguars in Brazil's Pantanal swamps studying mountain gorillas in Central Africa and predator-prey relations in the Serengeti tracking newfound species on the wild border of Vietnam and Laos searching for snow leopards in the Hindu Kush and Schaller's groundbreaking work with giant pandas in Sichuan Later accounts broaden the focus from individual creatures to whole ecosystems The careless rapture of my early studies has been replaced more and more by efforts to protect animals and their habitats he writes New to this book are Schaller's introductions for each chapter which add and update information and an overall introduction that looks back on his remarkable career
