*German Cities and Bourgeois Modernism, 1890-1924* Maiken Umbach, 2009-06-25 This is a study of a distinctive brand of modernism that first emerged in late nineteenth century Germany and remained influential throughout the inter war years and beyond Its supporters saw themselves as a new elite ideally placed to tackle the many challenges facing the young and rapidly industrializing German nation state They defined themselves as bourgeois and acted as self appointed champions of a modern consciousness Focusing on figures such as Hermann Muthesius Fritz Schumacher and Karl Ernst Osthaus and the activities of the Deutscher Werkbund and other networks of bourgeois designers writers and experts this book shows how bourgeois modernism shaped the infrastructure of social and political life in early twentieth century Germany Bourgeois modernism exercised its power not so much in the realm of ideas but by transforming the physical environment of German cities from domestic interiors via consumer objects to urban and regional planning Drawing on a detailed analysis of key material sites of bourgeois modernism and interpreting them in conjunction with written sources this study offers new insights into the history of the bourgeois mindset and its operations in the private and public realms Thematic chapters examine leitmotifs such as the sense of locality and place the sense of history and time and the sense of nature and culture Yet for all its self conscious progressivism German bourgeois modernism was not an inevitable precursor of neo liberal global capitalism It remained a hotly contested historical construct which was constantly re defined in different geographical and political settings

*Architecture and the Late Ottoman Historical Imaginary* AhmetA. Ersoy,2017-07-05 While European eclecticism is examined as a critical and experimental moment in western art history little research has been conducted to provide an intellectual depth of field to the historicist pursuits of late Ottoman architects as they maneuvered through the nineteenth century s vast inventory of available styles and embarked on a revivalist Orientalist program they identified as the Ottoman Renaissance Ahmet A Ersoy s book examines the complex historicist discourse underlying this belated renaissance through a close reading of a text

conceived as the movement's canonizing manifesto the Usul-i-Mimarî-i-Osmanî The Fundamentals of Ottoman Architecture Istanbul 1873 In its translocal cross disciplinary scope Ersoy's work explores the creative ways in which the Ottoman authors straddled the art historical mainstream and their new self-orientalizing aesthetics of locality The study reveals how Orientalism was embraced by its very objects the self-styled Orientals of the modern world as a marker of authenticity and a strategically located aesthetic tool to project universally recognizable images of cultural difference Rejecting the lesser subsidiary status ascribed to non-western Orientalisms Ersoy's work contributes to recent post-Saidian directions in the study of cultural representation that resituate the field of Orientalism beyond its polaristic core recognizing its cross-cultural potential as a polyvalent discourse

**Piranesi's Candelabra and the Presence of the Past** Caroline van Eck, 2023-01-17 Near the end of his life Giovanni Battista Piranesi 1720-78 created three colossal candelabra mainly from fragments of sculpture excavated near the Villa Hadriana in Tivoli two of which are now in the Ashmolean Museum and one in the Louvre Although they were among the most sought after and prestigious of his works and fetched enormous prices during Piranesi's life they suffered a steep decline in appreciation from the 1820s onwards and even today they are among the least studied of his works Piranesi's Candelabra and the Presence of the Past uncovers the intense investment by artists patrons collectors and the public around the start of the nineteenth century in objects that made Graeco-Roman Antiquity present again Caroline van Eck's study examines how objects make their makers or viewers feel that they are again in the presence of Antiquity that not only Antiquity has revived but that classical statues become alive under their gaze what it

takes to make such objects and what it costs to own them and about the ramifications of such intense if not excessive attachments to artefacts This book considers the three candelabra in depth providing the biography of these objects from the excavation of the Roman fragments to their entry into private and public collection Van Eck considers the context that Piranesi gave them by including them in his *Vasi Candelabri e Cippi* 1778 to rethink the processes that led to the development of neoclassicism from the perspective of the objects and objectsapes that came into being in Rome at the end of the eighteenth century

**Style and Solitude** Mari Hvattum, 2023-06-06 How modern notions of architectural style were born and the debates they sparked in nineteenth century Germany The term style has fallen spectacularly out of fashion in architectural circles Once a conceptual key to understanding architecture's inner workings today style seems to be associated with superficiality formalism and obsolete periodization But how did style once defined by German sociologist Georg Simmel as a place where one is no longer alone in architecture actually work How was it used and what did it mean In *Style and Solitude* Mari Hvattum seeks to understand the apparent death of style returning to its birthplace in the late eighteenth century and charting how it grew to influence modern architectural discourse and practice As Hvattum explains German thinkers of the eighteenth and nineteenth century offered competing ideas of what style was and how it should be applied in architecture From Karl Friedrich Schinkel's thoughtful eclecticism to King Maximilian II's attempt to capture the zeitgeist in an architectural competition style was at the center of fascinating experiments and furious disputes Starting with Johann Joachim Winckelmann's invention of the period style and ending a century later with Gottfried Semper's generative theory of style Hvattum explores critical debates that are still ongoing today

The Drama of History

Kristin Gjesdal, 2021 *The Drama of History* plumbs the rich relationship between drama and philosophy Kristin Gjesdal offers a lively and accessible discussion of the philosophical aspects of Henrik Ibsen's work She shows how well known nineteenth century philosophers such as Hegel and Nietzsche develop their thoughts in interaction with the dramatic arts At the heart of this interaction is a shared interest in exploring the existential condition of human life as lived and experienced in history In this sense Gjesdal engages philosophy's capacity beyond its narrow academic confines

**Forming National Identity in Iran** Ali Mozaffari, 2014-06-20 Modern Iran is a country with two significant but competing discourses of national identity one stemming from ancient pre Islamic customs and mythology the other from Islamic Shi'i practices and beliefs At one time co existing and often mutually reinforcing in more modern times they have been appropriated by intellectuals and the state who have drawn upon their narratives and traditions to support and authenticate their ideologies The result has been an often confused notion of identity in Iran In this essential work Ali Mozaffari explores the complex processes involved in the formation of Iranian national identity He lays particular stress upon the importance of place for it is through the concept of place that collective national identity and ideas of homeland are expressed and disseminated The author reveals the ways in which homeland is conceived both through designated permanent sites and ritual performance illustrating his arguments through an analysis of the ancient Achaemenid capital of Persepolis and the Shi'i rituals of Moharram In a final part of the book he extends his analysis to the Ancient Iran Museum and the Islamic Period Museum housed in the National Museum of Iran showing how the major transformations of twentieth century Iran which have so far been perceived in terms of political discourses and historical events are in fact concerned with conceiving place *Forming National Identity in Iran* offers powerful insights into the forces shaping national identity in Iran which makes it a valuable contribution to the cultural and political importance of place

**Art, Agency and Living Presence** Caroline van Eck, 2015-03-10 Throughout history and all over the world viewers have treated works of art as if they are living beings speaking to them falling in love with them kissing or beating them Although over the past 20 years the catalogue of individual cases of such behavior towards art has increased immensely there are few attempts at formulating a theoretical account of them or writing the history of how such responses were considered defined or understood That is what this book sets out to do to reconstruct some crucial chapters in the history of thought about such reflections in Western Europe and to offer some building blocks towards a theoretical account of such responses drawing on the work of Aby Warburg and Alfred Gell

**Cities and the Shaping of Memory in the Ancient Near East** Ömür Harmanşah, 2013-03-18 This book investigates the founding and building of cities in the ancient Near East The creation of new cities was imagined as an ideological project or a divine intervention in the political narratives and mythologies of Near Eastern cultures often masking the complex processes behind the social production of urban space During the Early Iron Age c 1200-850 BCE Assyrian and Syro Hittite rulers developed a highly performative official discourse that revolved around constructing cities cultivating landscapes building watercourses erecting monuments and initiating

public festivals This volume combs through archaeological epigraphic visual architectural and environmental evidence to tell the story of a region from the perspective of its spatial practices landscape history and architectural technologies It argues that the cultural processes of the making of urban spaces shape collective memory and identity as well as sites of political performance and state spectacle [The Idea of the Cottage in English Architecture, 1760 - 1860](#) Daniel Maudlin,2015-07-24

The Idea of the Cottage in English Architecture is a history of the late Georgian phenomenon of the architect designed cottage and the architectural discourse that articulated it It is a study of small buildings built on country estates and not so small buildings built in picturesque rural settings resort towns and suburban developments At the heart of the English idea of the cottage is the Classical notion of retreat from the city to the countryside This idea was adopted and adapted by the Augustan infused culture of eighteenth century England where it gained popularity with writers artists architects and their wealthy patrons who from the later eighteenth century commissioned retreats gate lodges estate workers housing and seaside villas designed to appear as cottages The enthusiasm for cottages within polite society did not last By the mid nineteenth century cottage related building and book publishing had slowed and the idea of the cottage itself was eventually lost beneath the Tudor barge boards and decorative chimneystacks of the Historic Revival And yet while both designer and consumer have changed over time the idea of the cottage as the ideal rural retreat continues to resonate through English architecture and English culture [The Printed and the Built](#) Mari Hvattum,Anne Hultzsch,2018-06-28

The Printed and the Built explores the intricate relationship between architecture and printed media in the fast changing nineteenth century Publication history is a rapidly expanding scholarly field which has profoundly influenced architectural history in recent years Yet while groundbreaking work has been done on architecture and printing in the Renaissance the Enlightenment and the twentieth century the nineteenth century has received little attention This is the omission that The Printed and the Built seeks to address thus filling a significant gap in the understanding of architecture s cultural history Lavishly illustrated with colourful and eclectic visual material from panoramas to printed ephemera adverts penny magazines early photography and even crime reportage The Printed and the Built consists of five in depth thematic essays accompanied by 25 short pieces each examining a particular printed form Altogether they illustrate how new genres communicated architecture to a mass audience setting the stage for the modern architectural era
