F. K. Koerner, 1973-01-01 Techmer's Internationale Zeitschrift für Allgemeine Sprachwissenschaft 1884-1890 served at a time of neogrammarian domination in the linguistic scene of the late 19th century as an international forum for the discussion of general linguistics topics the Humboldtian philosophy of language and the promotion of non Indo European linguistic research This essay starts with information on the founder and sole editor of the journal Friedrich Techmer then analyzes the most significant contributions to the journal surveying in the same part the range of publications as well as the international character of both the Advisory Board and the contributors and in the concluding chapter shows how IZAS is of relevance even for the linguistic pursuits of today

Einleitung in die Allgemeine Sprachwissenschaft (1884-1890) together with Zur Literatur der Sprachkunde Europas (Leipzig, 1887) August Friedrich Pott, 1974-01-01 This volume contains August Friedrich Pott's Einleitung in die Allgemeine Sprachwissenschaft which appeared between 1884 and 1890 in F Techmer's Internationale Zeitschrift für Allgemeine Sprachwissenschaft Leipzig In addition the volume contains Pott's Zur Literatur der Sprachkunde Europas Leipzig 1887 the obituary by Paul Horn Göttingen 1888 and a preface to this new edition by E F K Koerner **History of Linguistics, Volume IV** Anna Morpurgo Davies, Giulio C. Lepschy, 2016-04-15 The History of Linguistics to be published in five volumes aims to provide the reader with an authoritative and comprehensive account of the attitudes to language prevailing in different civilizations and in different periods by examining the very varied development of linguistic thought in the specific social cultural and religious contexts involved Issues discussed include the place of language in education variation and prestige and approaches to lexical and grammatical description The authors of the individual chapters are specialists who have analysed the primary sources and produced original syntheses by exploring the linguistic interests and assumptions of

particular cultures in their own terms without seeking to reinterpret them as contributions towards the development of contemporary western conceptions of linguistic science In Volume IV Nineteenth Century Linguistics Anna Morpurgo Davies shows how linguistics came into its own as an independent discipline separated from philosophical and literary studies and enjoyed a unique intellectual and institutional success tied to the research ethos of the new universities until it became a model for other humanistic subjects which aimed at scientific status The linguistics of the nineteenth century abandons earlier theoretical discussions in favour of a more empirical and historical approach using new methods to compare languages and to investigate their history The great achievement of this period is the demonstration that languages such as Sanskrit Latin and English are related and derive from a parent language which is not attested but can be reconstructed This book discusses in detail the theories developed and the individual findings obtained In contrast with earlier historiographical trends it denies that the new approach originated entirely from German Romanticism and highlights a form of continuity with the eighteenth century while stressing that a deliberate break took place round the 1830s By the end of the century the results of comparative and historical linguistics had been generally accepted but it soon became clear that a historical approach could not by itself solve all questions that it raised At this point the new interest in description and theory which characterizes the twentieth century began to gain prominence
