Derksen finds that second generation nonconformists were substantially different from the first Their social profile changed from an urban mix of leaders intellectuals and artisans they became largely rural folk composed of lower class artisans. Further in outlook their view narrowed from radicals who sought to change church and society at its root to dissenters concerned mainly to survive At the same time there were continuities. When the revolts of the 1525 Peasants War were crushed dissident ideals found new expression in spiritualist sectarian and apocalyptic streams. In these streams into the 1560s and beyond nonconformists continued their call for social and economic justice and meaningful participation in religion. The book will be of interest to historians of the Early Modern period the Reformation's radicals popular religion sixteenth century society and Strasbourg and to those interested in the free church tradition.
