texts in which dissident subjectivities practices and desires help to broaden the understanding of the Andean Winner of the prestigious Casa de las Américas prize the book was praised by the jury for the paradoxical and provocative way that it struggles against the abyss of past destruction and reflects on the contribution of the Global South to the often uniformist thinking around the body and its intersections

Body, Subject & Subjected Dr Debra D Andrist, 2016-01-01 Hominids have always been obsessed with representing their own bodies The first selfies were prehistoric negative hand images and human stick figures followed by stone and ceramic representations of the human figure Thousands of years later moving via historic art and literature to contemporary social media the contemporary term selfie was self generated The book illuminates some selfies This collection of critical essays about the fixation on the human self addresses a multi faceted geographic set of cultures the Iberian Peninsula to pre Columbian America and Hispanic America analysing such representations from medical literal and metaphorical perspectives over centuries Chapter contributions address the representation of the body itself as subject in

both visual and textual manners and illuminate attempts at control of the environment of perception of behaviour and of actions by artists and authors Other chapters address the body as subjected to circumstance representing the body as affected by factors such as illness injury treatment and death These myriad effects on the body are interpreted through the brushes of painters and the pens of authors for social and or personal control purposes The essays reveal critics insights when selfies are examined through a focused lens over a breadth of cultures The result complex and unique is that what is viewed the visual art and literature under discussion becomes a mirror image indistinguishable from the component viewing apparatus the lens
