Tresemmer, 2007-02 Flower essences are liquid energetic remedies derived from living flowers. They bring the natural dynamic energy of the plant directly into the human electro system where they work to bring about movement toward health and balance. Because of their energetic and living quality they work directly and deeply in the emotional system assisting in the release of early wounds and trauma. These suppressed imprints are considered to be a main cause of many types of diseases or imbalances today. Flower essences are a perfect complement to many of today's health practices. They enhance the effects of energy work, physical therapy, acupuncture, psychotherapy, cranial sacral work, massage, aroma therapy, and many other forms of healing and treatment. Flower essences are safe, natural, and non-toxic. Continuing the work of Edward Bach, *Stars of the Meadow* looks deeply into the relationship between health and the human personality. David Dalton takes us on a thorough and soulful exploration of how to use more than forty medicinal herbs as flower essences, portraying each flower in a way that is both substantive and inspired. Each description is organized to present a picture of how the flower essence affects the adult personality as it has been formed through life and describes its direct clinical effects on children and animals. Dalton also connects different types of flowers based on the number and arrangement of petals as well as associated colors and qualities to the system of human chakras or energy centers. This innovative approach allows the reader to discover new ways to employ flower essences to focus on specific areas of one's being from the most physical to the highest levels, allowing a kind of flexibility rarely found in any single system of healing. *Stars of the Meadow* is a valuable guide not only for those who are new to flower essences but also for seasoned herbalists who wish to deepen their knowledge of this effective method of healing body, mind, and soul.
