Walcott, Corey Johnson, 2013-11-12 Connectivity as well as conflict characterizes Eurasia This edited volume explores dynamic geopolitical and geo economic links reconfiguring spaces from the eastern edge of Europe through the western edge of Asia seeking explanation beyond description The ancient Silk Road tied together space much as pipelines railroads telecommunications infrastructure and similar cultural and constructed links ease the mobility of people and products in modern Eurasia This book considers Eurasia along an interlinked corridor with chapters illustrating the connections as a discussion foundation focusing on the shared interactions of a set of nation states through time and across space generating more positive considerations of the resurgently important region of Eurasia China s interests fall into three chapters the southeastern border with Vietnam the southwestern Himalayan edge and the western Muslim regions Russia s recovery relates events to a larger landmass context and focuses on the importance of historic mobility A geo history of the Caspian considers this petroleum rich area as a zone of cultural and economic interconnection The final focus on Central Asia treats the traditional heart of Eurasia The concluding chapter pulls together strands linking subregions for a new concept of Eurasia as an area linked by vital interests and overlapping histories **Heartlands of Eurasia** Anita Sengupta, 2009-07-16 *Heartlands of Eurasia* explores how received metageographical knowledge informs the understanding of global processes and is subsequently transformed into geopolitical reasoning with foreign policy implications It provides a detailed examination of writings from both within the region and outside that look into the significance of Halford Mackinder s heritage in the context of a vastly changed world situation In particular it attempts to examine how policy makers and strategic thinkers have used these geopolitical concepts as justification for their policy in the region Finally it attempts an analysis of the extent to which this policy thinking was translated into practice While the study looks into how the vision of the pivotal significance of a vast expanse of land finds its echoes in contemporary narratives it also underlines the very creative ways in which Mackinder s ideas have been reinterpreted in keeping with the changing global dynamics Making use of the way in which the region has been traditionally defined and the way in which the people defined themselves the study brings into focus a debate on the usefulness of region or area based studies that are located in geographical imaginations Anita Sengupta uses this connection to examine the following issues geopolitical imaginations and their relevance in identifying areas in the present context the intersection between how areas are defined from an outsider perspective and how people define themselves the extent to which these definitions have influenced policy and the possibility or feasibility of

the development of alternative geostrategic discourses Mackinder himself did not specify the geographical area identified first as the pivot and later the heartland but his ideas were focused on the closed heartland of Euro Asia an area that was unassailable by sea power This study therefore centers its debates around the Eurasian space in general though the focus is on the Central Asian region and Uzbekistan in p

Tassinari unravels the challenges facing the EU weighs the record of its policies and explains how both can be traced back to Europe's inherent insecurity Turning conventional wisdom on its head he argues that gradual and diversified forms of integration with its many neighbors is Europe's best alternative to a progressive but inexorable fragmentation of the EU The ability to meet this challenge will not only test Europe's unfulfilled global aspirations it will be crucial to its very survival
