L. Minckley,James E. Deacon,2017-08-15 In 1962 the Green River was poisoned and its native fishes killed so that the new Flaming Gorge Reservoir could be stocked with non native game fishes for sportsmen This incident was representative of water management in the West where dams and other projects have been built to serve human needs without consideration for the effects of water diversion or depletion on the ecosystem Indeed it took a Supreme Court decision in 1976 to save Devils Hole pupfish from habitat destruction at the hands of developers Nearly a third of the native fish fauna of North America lives in the arid West this book traces their decline toward extinction as a result of human interference and the threat to their genetic diversity posed by decreases in their populations What can be done to slow or end this tragedy As the most comprehensive treatment ever attempted on the subject Battle Against Extinction shows how conservation efforts have been or can be used to reverse these trends In

covering fishes in arid lands west of the Mississippi Valley the contributors provide a species by species appraisal of their status and potential for recovery bringing together in one volume nearly all of the scattered literature on western fishes to produce a monumental work in conservation biology They also ponder ethical considerations related to the issue ask why conservation efforts have not proceeded at a proper pace and suggest how native fish protection relates to other aspects of biodiversity planetwide Their insights will allow scientific and public agencies to evaluate future management of these animal populations and will offer additional guidance for those active in water rights and conservation biology First published in 1991 Battle Against Extinction is now back in print and available as an open access e book thanks to the Desert Fishes Council

After Extinction Richard Grusin, 2018-03-20 A multidisciplinary exploration of extinction and what comes next. What comes after extinction? Including both prominent and unusual voices in current debates around the Anthropocene, this collection asks authors from diverse backgrounds to address this question. After Extinction looks at the future of humans and nonhumans, exploring how the scale of risk posed by extinction has changed in light of the accelerated networks of the twenty-first century. The collection considers extinction as a cultural, artistic, and media event as well as a biological one. The authors treat extinction in relation to a variety of topics, including disability, human exceptionalism, science fiction, understandings of time, and posthistory. Photography, the contemporary ecological crisis, the California Condor, systemic racism, Native American traditions, and capitalism. From discussions of the anticipated sixth extinction to the status of writing theory and philosophy after extinction, the contributions of this volume are insightful and innovative, timely and thought-provoking.

Gone is Gone Isabelle Groc, 2019-09-24 Why do species become endangered? How are scientists learning about endangered wildlife? What are people doing to conserve species, and how can young people help? This book is richly illustrated with unique photos that Isabelle has taken over many years of observing endangered species in the field alongside the people who work to conserve them. Throughout, the author shares enchanting encounters and personal field stories: watching narwhals socialize in the Canadian Arctic; getting close to a Laysan albatross raising chicks on a remote Hawaiian island; spotting a rhinoceros on safari; and even swimming with sea lions in the Galapagos Islands. *Gone is Gone* will inform, intrigue, and inspire readers to take small steps toward big changes for endangered species around the world. The epub edition of this title is fully accessible.
