Endangered Children Parents Who Kill:

Endangered Children Lita Linzer Schwartz, Natalie K. Isser, 2000-06-22 People are horrified when parents kill their children yet this act occurs daily on a global basis Endangered Children Neonaticide Infanticide and Filicide provides a psychological sociological and criminological perspective of these acts as the authors answer the many questions that arise from these crimes With an emphasis on neonati

When Caregivers Kill Betty L. Alt, Sandra K. Wells, 2010-04-16 From mothers who kill their children in postpartum fugues to fathers who murder their kids for revenge against an estranged wife the stories in this book are chilling yet real and bring home the message that children are vulnerable to violence even in the care of those who should love and protect them the most Sadly child murder by parents and caregivers happens more frequently than one might guess and while each case is different there are often warning signs that something might be amiss Signs of physical abuse may precede the ultimate act of murder A mother's mental state after the birth of a child may signal true distress and the potential for extreme actions No one can predict with certainty when a parent or other caregiver may snap but here Alt and Wells examine many cases of child murder to find out what they have in common how we might prevent such violence and what more we can do to protect children in potentially explosive situations

Parents Killing Children Janice Sim, 2018-10-04 Parents Killing Children Crossing the Invisible Line explores hidden forms of violence within the family This socio legal study addresses the interactions between the family and the state focusing on six parent perpetrators and the ways in which child endangerment is concealed within society Drawing on symbolic interactionism mythology and a modelling of case study data this book puts forward a unique conceptualisation of representation and risk both on familial and state levels The failure of the state to intervene and neutralise volatile perpetrators also sheds light on the socio legal status of children society's most vulnerable and the book concludes by discussing means by which the underlying social conditions and maladies symptomatic of child abuse and killing should be addressed

Bloody Murder Michelle Ann Abate, 2013-03-01 Off with her head decreed the Queen of Hearts one of a multitude of murderous villains populating the pages of children's literature explored in this volume Given the long standing belief that children ought to be shielded from disturbing life events it is surprising to see how many stories for kids involve killing *Bloody Murder* is the first full length critical study of this pervasive theme of murder in children's literature Through rereadings of well known works such as *Alice's Adventures in Wonderland* the *Nancy Drew Mystery Stories* and *The Outsiders* Michelle Ann Abate explores how acts of homicide connect these works with an array of previously unforeseen literary social political and cultural issues Topics range from changes in the America criminal justice system the rise of forensic science and shifting attitudes about crime and punishment to changing cultural conceptions about the nature of evil and the different ways that murder has been popularly presented and socially interpreted *Bloody Murder* adds to the body of inquiry into America's ongoing fascination with violent crime Abate argues that when narratives for children are considered along with other representations of homicide in the United States they not only provide a more accurate portrait of the range depth and variety of crime literature they also alter existing ideas about the meaning of violence the emotional appeal of fear and the cultural construction of death and dying

Muirhead, 2014-10-01 Maternal filicide has been discussed in the medical mental health and child abuse fields yet little research exists with a criminal justice law enforcement perspective Nevertheless criminal justice professionals responsible for investigation and prosecution of these offenders often must give attention to unique behavioral social and psychological dynamics not considered in many other types of cases The Federal Bureau of Investigation's FBI Behavioral Analysis Unit BAU III Crimes Against Children identified collected and reviewed law enforcement case files in which a biological mother killed her child ren Collectively the cases involve 213 biological mothers who killed 265 children and are comprised of neonaticide infanticide and filicide cases Data analysis revealed that the offenders ranged in age from 12 46 years and many were unmarried unemployed and had a history of violence Many of the victims were three years of age or younger did not
