Metzler, 2006-03-02 The field of endocrine disruption or endocrine active compounds EACs which is just emerging and still controversial is comprehensively covered by leading experts in Volume 3 Subvolumes L Part I and M the present volume Part II The major classes of endocrine active chemicals are discussed as well as methods for their detection and their association with health disturbances in humans and wildlife The etiology of several of the human diseases associated with endocrine disruptors e g breast and prostate cancer decreased fertility and malformations is still poorly understood and the current state of knowledge is presented Since hormonally active agents appear to have the potential of both adverse and beneficial effects the evidence of health benefits associated with endocrine active compounds in humans is also presented Basic chapters on the mode of action of EACs and on the etiology of the associated diseases facilitate the understanding of this complex subject for non medical readers

Endocrine Disruptors in the Environment Sushil K. Khetan, 2014-05-23 *Endocrine Disruptors in the Environment* A concise and engaging overview of endocrine disruption phenomena that brings complex concepts within the reach of non specialists For most of the last decade the science of endocrine disruption has evolved with more definitive evidence of its damaging potential to health and environment This book lists the major environmental chemicals of concern and their mechanism of endocrine disruption including remedial measures for them Divided into three parts *Endocrine Disruptors in the Environment* begins with an overview of the endocrine system and endocrine disruptors discussing their salient features and presenting a historical perspective of endocrine disruption phenomena It then goes on to cover hormone signaling mechanisms followed by various broad classes of putative endocrine disruptors before introducing readers to environmental epigenetic modifications Part two of the book focuses on removal processes of various EDCs by biotic and abiotic transformation degradation The last section consists of four chapters embracing themes on finding solutions to environmental EDCs including their detection regulation replacement and remediation *Endocrine Disruptors in the Environment* is the first book to detail the endocrine effects of several known environmental contaminants and their mechanism of endocrine disruption Additionally it Covers both the chemistry and biology of endocrine disruption and compiles almost all the known endocrine disrupting environmental chemicals and their mechanisms of toxicity Addresses policy and regulatory issues relevant to EDCs including scientific uncertainty and precautionary policy Brings forth the use of

Naz,2004-11-29 There is great concern regarding the reproductive and health hazards of endocrine disruptors Research indicates that men are experiencing declining fertility and an increased incidence of prostate cancer while women are dealing with increased infertility early menopause and breast cancer As new research reveals the previously unknown risks of Environmental Endocrinology and Endocrine Disruptors Rosario Pivonello,Evanthia Diamanti-Kandarakis,2023-04-20 This book describes how exposure to various classes of endocrine disruptors as well as other environmental chemicals targeting the endocrine system by alternative non endocrine mechanisms impact on endocrinological and endocrinological related diseases It includes comprehensive reviews of all aspects of environmental

endocrinology ranging from sources and patterns of exposure and identification of endocrine targets to direct endocrine disruptive mechanisms and indirect actions on the endocrine system the latter including endocrine cell directed cytotoxicity oxidative damage and genetic and epigenetic aberrations resulting in endocrine damage It also examines the causal pathways and offers an extensive overview of downstream endocrinological and endocrinological related disorders In addition several chapters focus on transgenerational actions which are a topic of particular interest Lastly evidence from preclinical and clinical studies provides the basis for an in depth critical discussion of each topic The book is part of the SpringerReference program which provides access to living editions that are constantly updated using a dynamic peer review publishing process

Environmental Endocrine Disruptors A Crain, L J Guillette Jr, 2000-08-17 Addresses many aspects of endocrine disruption by environmental encountered toxic substances Initial chapters provide essential background information whilst later chapters address specific aspects of endocrine disrupting contaminants EDC

Endocrine Disruptors and Puberty Evanthia Diamanti-Kandarakis, Andrea C. Gore, 2011-12-01 Endocrine disruption represents one of the most controversial environmental issues of our time Mounting evidence stemming from more than 10 years of experimental epidemiological and clinical studies has transformed the once generally discounted subject of endocrine disruptors into an issue of tremendous concern not only within the scientific community but among society as a whole Following initial evidence from basic research endocrine disruption in humans has now emerged as a major medical challenge In this respect puberty a crucial developmental stage has been definitively identified as a key window of vulnerability with regard to endocrine disruptors Written by leading authorities in the field *Endocrine Disruptors and Puberty* offers an engaging and comprehensive overview of this fascinating and rapidly growing problem An indispensable resource for all clinicians and scientists interested in this challenging endocrinologic topic *Endocrine Disruptors and Puberty* is a timely contribution that will help navigate a path toward understanding the problem and developing solutions

Endocrine Disrupting Chemicals R M Harrison, R E Hester, 2007-10-31 Long term environmental effects of chemical exposure have long been of concern and more recently chemicals which cause changes to the sexual

development of exposed organisms have been identified. It is thought that low level exposure to a wide range of chemicals may be affecting endocrine function leading to a reduction in fertility and an increase in reproductive cancers. Endocrine Disrupting Chemicals reviews the scientific evidence and attempts to put the subject into context. Along with an overview of the issue, there is discussion of the specialised aspects in relation to wildlife, environmental oestrogens and male reproduction and naturally occurring oestrogenic substances. With contributions from representatives of the Medical Research Council, the Institute for Environment and Health and the US Environmental Protection Agency, the articles provide a comprehensive and detailed review of current issues. This book will be of interest to a wide readership including industrial and environmental scientists, managers and policy makers.

Endocrine Disrupting Chemicals-induced Metabolic Disorders and Treatment Strategies Muhammad Sajid Hamid Akash, Kanwal Rehman, Muhammad Zaffar Hashmi, 2020-08-04. This volume offers a detailed and comprehensive analysis of Endocrine Disrupting Chemicals (EDCs) covering their occurrence, exposure to humans and the mechanisms that lead to the pathogenesis of EDCs-induced metabolic disorders. The book is divided into three parts. Part I describes the physiology of the human endocrine system with special emphasis on various types of metabolic disorders along with risk factors that are responsible for the development of these disorders. Part II addresses all aspects of EDCs including their role in the induction of various risk factors that are responsible for the development of metabolic disorders. Part III covers up to date environmental regulatory considerations and treatment strategies that have been adopted to cure and prevent EDCs-induced metabolic disorders. This section will primarily appeal to clinicians investigating the causes and treatment of metabolic disorders. The text will also be of interest to students and researchers in the fields of Environmental Pharmacology and Toxicology, Environmental Pollution, Pharmaceutical Biochemistry, Biotechnology and Drug Metabolism, Pharmacokinetics.

Challenges in Endocrine Disruptor Toxicology and Risk Assessment Alberto Mantovani, Alexandra Fucic, 2020-12-08. Insight into the role of hormones, particularly estrogen and testosterone, in health and disease etiology, including interactions with other hormone pathways, has dramatically changed. Estrogen and androgen receptors, with their polymorphisms, are key molecules in all tissues and are involved in a number of homeostatic mechanisms but also pathological processes including carcinogenesis and the development of metabolic and neurological disorders such as diabetes and Alzheimer's disease. Endocrine disrupting chemicals (EDCs) can interfere with the endocrine hormone systems at certain dosages and play a key role in the pathology of disease. Most known EDCs are manmade and are therefore an increasing concern given the number commonly found in household products and the environment. This book will cover the mechanisms of EDC pathology across the spectrum of disease as well as risk assessment and government and legal regulation to provide a holistic view of the current issues and cutting edge research in the topic. With contributions from global leaders in the field, this book will be an ideal reference for toxicologists, endocrinologists and researchers interested in developmental biology, regulatory toxicology and the interface between environment and human health.
