Energy Production Satoto Endar Nayono, 2010 Anaerobic digestion of the organic fraction of municipal solid waste as such or together with food waste press water or potatoes sludge was investigated to equilibrate methane production within a day or over the weekend when no OFMSW was available A stable co digestion process could be achieved with COD degradation between 60 and 80 % The max organic loading rates were 28 kg COD L d For stable methane production the OLR during Co digestion should not exceed 22.5 kg L

Energy Recovery from Municipal Solid Waste by Thermal Conversion Technologies P. Jayarama Reddy, 2016-03-30 This book presents an overview of municipal solid waste recycling and how it can be used to generate clean power transport fuels that can substitute fossil fuels and value based chemicals with minimal environmental impact It also explains how hazardous wastes and sewage sludge can be treated and disposed of without affecting human and environmental health A full discussion of established thermal conversion technologies that generate heat electricity liquid fuels and useful chemicals from solid waste and supporting case studies describing global waste to energy plants in operation make this work highly suited to an introductory course on waste thermal conversion processes
