

The book cover features a complex, golden-colored illustration on a dark blue background. At the top is a sun with a human-like face, surrounded by long, thin rays. Below the sun, a network of red lines, resembling roots or veins, spreads across the cover. In the background, there are faint, golden geometric shapes, including a large circle and a square with internal lines. The title 'Energy, Plants and Man' is written in a large, elegant, golden serif font, with 'Energy, Plants' on the first line, 'and' on the second, and 'Man' on the third. The author's name, 'David Walker', is at the bottom in a smaller, golden serif font.

Energy Plants And Man:

Plants, Man and the Land in the Vilcanota Valley of Peru D.W. Gade, 2012-12-06 Man's symbiosis with plants is the most fundamental material fact of human life on the earth. Geographers as well as botanists, anthropologists and other scientists have long been interested in this aspect of the man-nature theme. In American geography, CARL O. SAUER emphasized a temporal as well as spatial perspective in the cultural understanding of man's relationship to biological phenomena. His researches and those of his associates in the Berkeley school showed that the most fruitful possibilities for implementing this approach are in non-industrial societies which have direct and pervasive links between plants and man. GADE 1975. The study that follows is a geography of plant resources in an important Andean valley having great environmental diversity and a cultural constant in so far as a non-literate Quechua-speaking peasantry dominates throughout the zone. My basic objective has been to understand the present use of plants cultivated and wild as they have varied from place to place and through time. Primary and secondary documents and local informants were important sources of historical information. Most of the contemporary data in this study were derived from over 20 months of empirical observations of the day-to-day existence of farming folk in their fields, homes and markets. The great natural beauty of the Vilcanota depression is matched only by the stark poverty which has been the lot of the majority of people who live there. *Universities, National*
