Engaging The State And Busineb The Labour Movement And Codetermination In Contemporary South Africa: Rethinking the Labour Movement in the 'New South Africa' Franco Barchiesi, 2019-01-15 Title first published in 2003 In recognition of the power of organised labour the ANC Government elected in 1994 granted South Africa's unions unprecedented legal and constitutional rights Despite these gains the country's unions have faced a fresh set of challenges many of them emanating from their political allies in Government From Parliament to the factory floor South Africa's unions are now confronted with threats as dangerous as those they confronted when organising illegally in the heyday of apartheid The purpose of this book is to examine how South African unions have responded and how well prepared they are to meet the challenges that confront them in the new millennium Engaging the State and Business Glenn Adler, 2000 One of the most innovative aspects of South Africa's democratization has been the emergence of institutions and processes through which workers and unions may challenge the state and business to gain varying degrees of control over important economic decisions These features are unprecedented in the old South Africa Moreover such institutions and processes are virtually unknown among developing countries undergoing democratization and have few precedents among advanced industrial countries that have well established systems of codetermination Scholars and practitioners have focused on specific elements of these changes such as the National Economic Development and Labour Council NEDLAC or the workplace forum provisions of the Labour Relations Act But they have generally missed the fact that the changes have implications ranging from the factory floor to the national and societal level and the extent to which labor has obtained strong decision making and consultation rights Taken together these features have the potential to deepen dramatically the political democracy won in 1994 The chapters in this volume have been written by academics independent researchers and researchers affiliated with labor The contributions combine depth of research and critical appraisal with privileged insights into current policy developments The Oxford Handbook of Employment Relations Adrian Wilkinson, Geoffrey Wood, Richard Deeg, 2014-03-13 There have been numerous accounts exploring the relationship between institutions and firm practices However much of this literature tends to be located into distinct theoretical traditional silos such as national business systems social systems of production regulation theory or varieties of capitalism with limited dialogue between different approaches to enhance understanding of institutional effects Again evaluations of the relationship between institutions and employment relations have tended to be of the broad brushstroke nature often founded on macro data and with only limited attention being accorded to internal diversity and details of actual practice. The Handbook aims to fill this gap by bringing together an assembly of comprehensive and high quality chapters to enable understanding of changes in employment relations since the early 1970s Theoretically based chapters attempt to link varieties of capitalism business systems and different modes of regulation to the specific practice of employment relations and offer a truly comparative treatment of the

subject providing frameworks and empirical evidence for understanding trends in employment relations in different parts of

the world Most notably the Handbook seeks to incorporate at a theoretical level regulationist accounts and recent work that link bounded internal systemic diversity with change and at an applied level a greater emphasis on recent applied evidence specifically dealing with the employment contract its implementation and related questions of work organization It will be useful to academics and students of industrial relations political economy and management Blunting Neoliberalism L. Fraile, 2016-04-30 This volume is one of the first books to consider the impact of tripartism across the developing world It covers 8 case studies from Africa Asia Eastern Europe and Latin America focusing on developments since the 1990s These studies show that tripartism has the effect of reducing the social impact of neoliberal economics reforms and India Isabel Hofmeyr, Michelle Williams, 2011-05-01 An innovative book about the relationship between South Africa and India South Africa's future is increasingly tied up with that of India While trade and investment between the two countries is intensifying they share long standing historical ties and have much in common apart from cricket colonialism and Gandhi both countries are important players in the global South As India emerges as a major economic power the need to understand these links becomes ever more pressing Can the two countries enter balanced forms of exchange What forms of transnational political community between these two regions have yet to be researched and understood The first section of South Africa and India traces the range of historical connection between the two countries The second section explores unconventional comparisons that offer rich ground on which to build original areas of study This innovative book looks to a post American world in which the global South will become ever more important Within this context the Indian Ocean arena itself and South Africa and India in particular move to the fore The book s main contribution lies in the approaches and methods offered by its wide range of contributors for thinking about this set of circumstances Trade Unions and the Coming of Democracy in Africa J. Kraus, 2007-12-09 In this book top scholars look at the efficacy of trade union and worker protest in overthrowing authoritarian governments in Africa The analytical introduction and case studies from major African countries argue that unions were often the most important single social force in the democratization process States at Crossroads Keiichi Tsunekawa, Yasuyuki Todo, 2018-11-30 This book is open access under a CC BY NC ND license This volume analyzes the economic social and political challenges that emerging states confront today Notwithstanding the growing importance of the emerging states in global affairs and governance many problems requiring immediate solutions have emerged at home largely as a consequence of the rapid economic development and associated sociopolitical changes The middle income trap is a major economic challenge faced by emerging states This volume regards interest coordination for technological upgrading as crucial to avoid the trap and examines how various emerging states are grappling with this challenge by fostering public private cooperation voluntary associations of market players and or social networks Social disparity is another serious problem It is deeply rooted in history in the emerging states such as South Africa and many Latin American countries However income distribution is recently deteriorating even in East Asia that was once praised for its high economic growth with equity Increasing pressure for political opening is another challenge for emerging states This volume argues that the economic social and political problems are interwoven in the sense that the emerging states need to build political consensus in order to tackle the economic and social difficulties Democratic institutions have not always been successful in this respect Employee Voice in Emerging Economies Amanda Pyman, Paul J. Gollan, Adrian Wilkinson, Cathy Xu, Senia Kalfa, 2016-12-15 While much is known about employee voice in the developed world much less is known about its operation in emerging economies This volume explores the nature of employee voice in Argentine China India and South Korea providing a timely challenge to the predominant assumptions that underline our knowledge of employee voice in the Business and the State in Southern Africa Scott D. Taylor, 2007 Why are productive development supporting relations between business and government still so rare in Africa Scott Taylor addresses this question examining state business coalitions as they emerge and endure or collapse in three representative countries Zambia Zimbabwe and South Africa Taylor illuminates three possible trajectories an abortive state business coalition as in Zambia the emergence of a short lived coalition as in Zimbabwe and a relatively successful and thus far durable coalition as in South Africa Though rooted in the southern African experience his cases reflect much of the variance in outcomes throughout sub Saharan Africa and shed light on the prospects for economic reform and development on the continent It explores why state business coalitions emerge or do not in Africa and why they endure or collapse drawing on three representative case studies

Critical Engagement with Public Sociology Andries Bezuidenhout, Sonwabile Mnwana, Karl von Holdt, 2024-01-16 The idea of public sociology as introduced by Michael Burawoy was inspired by the sociological practice in South Africa known as critical engagement This volume explores the evolution of critical engagement before and after Burawoy's visit to South Africa in the 1990s and offers a Southern critique of his model of public sociology Involving four generations of researchers from the Global South the authors provide a multifaceted exploration of the formation of new knowledge through research practices of co production Tracing the historical development of critical engagement from a Global South perspective the book deftly weaves a bridge between the debates on public sociology and decolonial frameworks Civil Society, Participatory Governance, and Decent Work Objectives Konstantinos Papadakis, 2006 The present study presents the findings of an in depth research project carried out at the International Institute for Labour Studies from 2002 to 2005 designed to better understand how civil society organizations working within participatory governance structures may contribute to the goals of the ILO decent work agenda The author examines the South African experience Since the mid 1990s South Africa has become a centre of innovation in public policy making and implementation and it is hard to find a country in either the developed or developing world that has gone further in the institutionalization of participatory policy making processes in a range of different fields This study focuses on three areas all relevant to the decent work agenda Employment creation and poverty alleviation health care and HIV AIDS and child labour and examines the participatory processes set up at the national level in order to formulate and implement policies in these areas It draws on both a literature review and the perceptions of key policy actors active in these three areas The Roots of Participatory Democracy M. Williams, 2008-05-26 This book compares the Communist parties of India and South Africa in their pursuits of socialist democracy Williams looks at their organizational characteristics party history and their competing tendencies as well as how they have pushed forward their similar ideologies within their unique political and economic environments **COSATU'S Contested Legacy** Sakhela Buhlungu, Malehoko Tshoaedi, 2013-04-15 COSATU's Contested Legacy provides a fresh and up to date analysis of trade unionism in contemporary South Africa by focusing on the Congress of South African Trade Unions the largest and most powerful federation Drawing on quantitative data from four time series surveys of union members over a period of sixteen years the authors present rigorous and authoritative analyses that shed light on the dilemmas and opportunities facing trade unionism today The volume shows how various sections of the trade union movement grapple with these dilemmas and contest with one another to chart a future trajectory for trade unionism **Precarious Liberation** Franco Barchiesi, 2011-06-01 Examines the relationship of precarious employment to state policies on citizenship and social inclusion in the context of postapartheid South Africa **A Love Letter to the Many** Vishwas Satgar, 2024-07-01 South Africa was the hope of the world It had an impressive and rich tradition of left politics At the heart of post apartheid democracy making was a revolutionary nationalist ANC the oldest Communist Party in Africa the SACP and one of the most militant labour union federations in the world COSATU Yet South Africa is at a crossroads and many are deeply concerned about its future This book explains through a political economy ecology analysis why and how the degeneration of national liberation politics has happened while making praxis centered arguments for a new transformative left politics Public Service Labour Relations in a Democratic South Africa Glenn Adler, 2000 The democratic South Africa boasts some of the most advanced labour legislation in the world allowing public service workers to enjoy trade union and collective bargaining rights for the first time in the country's history These developments set the stage for public servants to bring their conditions of service into line with the industrial relations best practice in the private sector The chapters in this volume are based on critical assessments of contemporary developments in the public service drawn from original research by a range of contributors including public servants academics and independent researchers all specialists in this field The problem of addressing workers demands and concerns about job security transforming the state into a more effective agent of development and redressing the legacies of discrimination and authoritarianism is likely to generate considerable conflict between workers and managers and between different groups of workers made international headlines in August 1999 demonstrated that labour management strife in the public service is not a narrow industrial relations issue of interest to the parties alone The outcomes of these conflicts will have crucial and long lasting consequences for the transformation of the state as an institution and therefore for the governments s ability to promote fiscal integrity economic development and service delivery The contributions thus combine

depth of research and critical appraisal with privileged insight into recent policy developments *People Out of Place* Alison Brysk, Gershon Shafir, 2004-07-31 Globalization pushes people out of place across borders out of traditions into markets and away from the rights of national citizenship But globalization also contributes to the spread of international human rights ideas and institutions This book analyzes the impact of these contradictory trends with a focus on vulnerable groups such as migrants laborers women and children Theoretical essays by Richard Falk Ronnie Lipschutz Aihwa Ong and Saskia Sassen rethink the shifting nature of citizenship This collection advances the debate on globalization human rights and the meaning South African Journal of Labour Relations ,2003 **Beyond the Apartheid Workplace** Eddie Webster, Karl Von Holdt, 2005 Has the apartheid workplace changed over the past ten years of democracy in South Africa In order to answer this question the contributors of this book studied seventeen different workplaces including BMW a state hospital footwear sweatshops and the wine farming industry The editors broaden the definition of work to cover studies of the informal economy including street traders homeworkers and small rural enterprises Beyond the Apartheid Workplace shows how South Africa s triple transition towards political democracy economic liberalization and post colonial transformation has generated contradictory pressures at workplace levels A wide range of managerial strategies and union responses are identified demonstrating both continuities and discontinuities with past practices. These studies reveal a growing differentiation within the world of work between stable formal sector work casualized and outsourced work and informal work where people struggle to make a living on the margins of the formal economy. The majority of workplaces are marked by the persistence and reconfiguration of the apartheid legacy Deepening poverty and exclusion have been generated among great numbers of workers and their dependents African Sociological Review ,2001
