The first chapter is dedicated to Computer Animation because it deals with all topics presented in the other chapters. Several animation systems are described as well as specific subjects like 3D character animation, quaternions and splines. The second chapter is dedicated to papers on Image Synthesis. 11 particular new shading models and new algorithms for ray tracing are presented. Chapter 3 presents several algorithms for geometric modeling and new techniques for the creation and manipulation of curves, surfaces and solids and their applications to CAD. In Chapter 4 an important topic is presented: the specification of graphics systems and images using languages and user interfaces. The last two chapters are devoted to applications in sciences, medicine, engineering, art and business. **Index**, 1997 **Recent Publications on Governmental Problems**, 1989 **Object Data Management** Roderic Geoffrey Galton Cattell, 1994 This revised introduction to object oriented and extended relational
