## **Engineering Communist China:**

Scientific and Engineering Manpower in Communist China, 1949-1963 Zhuyuan Zheng, 1967     *Engineering Communist China* You-Li Sun, Dan Ling, 2003 Dan Ling a patriotic young engineer eager to help build a new China falls afoul of the authorities and spends 17 years as a political prisoner Rehabilitated after Deng Xiaoping came to power Dan returns to work with unflagging determination to help provide a good life for himself and his people after enduring prison work camps and work farms and the primitive life of the social outcast breaking new ground on the frozen northern frontier Lings personal story is interwoven with glimpses of rural and urban life from the 1950s to the 1970s as China fought to make the wrenching leap from a feudalistic to a modern society Ancient practices alternate with breath taking and misguided experimentation as the common man is called upon to stride boldly into the unknown but no doubt glorious future Scenes of naivety brutality generosity and pettiness personal bonds and vendettas illustrate how peasants workers and intellectuals survived in the evolving Communist system This is an expose written without rancor and a heartening story of faith in man s ability to progress     *Scientific and Engineering Manpower in Communist China, 1949-1963* National Science Foundation (U.S.).

**Engineering, Development and Philosophy** Steen Hyldgaard Christensen, Carl Mitcham, Bocong Li, Yanming An, 2012-10-30 This inclusive cross cultural study rethinks the nexus between engineering development and culture It offers diverse commentary from a range of disciplinary perspectives on how the philosophies of today s cultural triumvirate American European and Chinese are shaped and given nuance by the cross fertilization of engineering and development Scholars from the humanities and social sciences as well as engineers themselves reflect on key questions that arise in this relational context such as how international development work affects the professional views identities practice and ethics of engineers The first volume to offer a systematic and collaborative study that cuts across continental boundaries the book delineates the kinds of skills and competences that tomorrow s engineering success stories will require and analyzes fascinating aspects of the interplay between engineering and philosophy such as how traditionally Chinese ways of thinking can influence modern engineering practice in the world s most populous country China s problematic mix of engineering woes and wonders from the high profile crash on its high profile rail network to its bird s nest Olympic stadium adds to the urgency for reform while Europe s Enlightenment informed legal frameworks are contrasted with Chinese mechanisms in their governance of the field of nanotechnology a crucial element of future technical evolution Fascinating and compelling in equal measure this volume addresses one of the topics at the leading edge of humanity s quest to survive and to thrive

Instead of liberating the country, the communists destroyed the old order and replaced it with a repressive system that would dominate every aspect of Chinese life. In an epic of revolution and violence which draws on newly opened party archives, interviews, and memoirs, Frank Dikötter interweaves the stories of millions of ordinary people with the brutal politics of Mao's court. A gripping account of how people from all walks of life were caught up in a tragedy that sent at least five million civilians to their deaths.      **Monthly Catalog of United States Government Publications** United States.
