Engineering Excellence Cultural And Organizational Factors:

Engineering Excellence, Cultural and Organizational Factors Donald Christiansen, 1987 **Engineering Excellence, Cultural and Organizational Factors** Donald Christiansen, 1987 **Influence of Psychological Factors on Product Development** E.S. Kamata, 2006-01-19 This book focuses on the interrelationship of social technical and organizational aspects of and related to the product development process It originated from activities in practice in industry and research laboratories In order to ensure relative autonomy from the short term economic interests of a given industrial branch or specific company the research for this work was first conducted in pursuit of a PhD thesis intended to provide practice oriented results With the ansatz practice theory practice a generalizable approach was achieved It then evolved to cover additional issues brought forth by recent cases in the aerospace industry among others A combination of scientific methodologies is used to focus on the psychological factors that influence the quality of technical product development processes The basic framework is provided by the grounded theory a qualitative approach in which data was not only collected by this author but is extended to cases from the history of technology described in the published literature The inclusion of historical cases is possible thanks to the availability of sufficiently detailed descriptions for examination in terms of the grounded theory principles They appear in the Appendix Cases cited were verified by comparing them with contrasting viewpoints from various sources I was able to examine and complement some cases by contacting persons associated with the programs analyzed Quantitative studies are also integrated in this research to verify the elements resulting from the grounded theory integration **Engineering as a Social Enterprise** National Academy of Engineering, 1991-02-01 How is society influenced by engineering and technology How in turn does society shape engineering and technology This book from the National Academy of Engineering explores ways in which technology and society form inseparable elements in a complex sociotechnical system The essays in this volume are based on the proposition that many forces move and shape engineering technology culture and society Six specialists both inside and outside the field of engineering offer views on how engineering responds to society's needs and how social forces shape what engineers do and what they can achieve **Securing India's Future in the New Millennium** Brahma Chellaney, 1999 The first comprehensive study of the different facets of India's national security the book looks ahead at the challenges of the coming years India's leading experts on strategic affairs including seven advisers to the National Security Council examine the tasks that lie ahead This book is designed to initiate a wider public debate on those challenges and opportunities and help India develop a strategic culture and an institutionalised integrated approach to national security **High-Tech Industries, Employment and Global Competitiveness** S.R. Hashim, N.S. Siddharthan, 2020-11-29 The process of development in recent times has been characteristically marked by the expanding reach of multinational enterprises flows of foreign direct investment unprecedented growth of information and communication technologies ICT and knowledge based industries and infusion of ICT across the entire spectrum of industries

and activities High tech knowledge based industries like information technology biotechnology pharmaceuticals and so on have played an important role in the transition of Chinese and Indian economies the two largest and fastest growing economies This inter disciplinary book offers an in depth understanding of the behaviour of firms in these industries analysing the strategies they adopt in a globally competitive environment the role they have played in ushering in the growth revolution in China and India and the contribution they have made to the nature and growth of employment This study also dwells upon the emerging nature of scientific and technological developments like nanotechnology novel materials spintronics and quantum computers with the conclusion that in the future knowledge and technology are going to be the real sources of wealth for nations
