Engineering Software For Microcomputers:

Microcomputer Software for Civil Engineers Howard Falk, 2012-12-06 This is a book about software packages for use by civil engineers It is written for engineers who need software that can do the job without requiring that they become computer experts or programmers The purpose of this book is to present a broad picture of the personal computer packages now available for use by civil engineers Each chapter is devoted to an area such as structures surveying hydrology drafting or equation solving in which a number of software packages are presently offered for use with personal computers The chapter introductions explain what kinds of design or analysis or other tasks these packages perform outlining the available choices and comparing the capabilities of the various packages Detailed reviews of individual packages follow The emphasis here is on what the user must know and do to employ the capabilities of the package Going beyond general description these reviews also explain what the packages actually will and will not do Although many packages are covered there is no attempt here at completeness In every category covered in the book many more packages exist than those that have been reviewed In the fast moving field of engineering software many new packages are currently being written and marketed
