Kletz, 1985-01-01 *An Engineer's View of Human Error* Trevor A. Kletz, 1991 **Human Factors for Engineers** Carl Sandom, Roger S. Harvey, 2004-08-13 The book discusses human factors integration methodology and reviews the issues that underpin consideration of key topics such as human error automation and human reliability assessment Implementation of Safety and Health on Construction Sites Amarjit Singh, Jimmie Hinze, Richard J. Coble, 1999-01-01 The text offers 123 articles on recent research and practice in construction safety from 19 developed countries Topics covered include safety management and planning education and training innovative safety technology site safety and progra Guidelines for Preventing Human Error in Process Safety CCPS (Center for Chemical Process Safety), 2010-08-13 Almost all the major accident investigations Texas City Piper Alpha the Phillips 66 explosion Feyzin Mexico City show human error as the principal cause either in design operations maintenance or the management of safety This book provides practical advice that can substantially reduce human error at all levels In eight chapters packed with case studies and examples of simple and advanced techniques for new and existing systems the book challenges the assumption that human error is unavoidable Instead it suggests a systems perspective This view sees error as a consequence of a mismatch between human capabilities and demands and inappropriate organizational culture This makes error a manageable factor and therefore avoidable

Computer Control and Human Error Trevor Kletz, 1995-09-18 Computer Control and Human Error presents accounts of various incidents at computer controlled plants These incidents include equipment and software faults treating the computer as a black box misjudging the way operators respond to the computer errors in the data entry failure to inform operators of changes in data or programs and unauthorized interference with peripheral equipment The discussion then turns to the use of hazard and operability studies Hazops to prevent or reduce errors in computer controlled plants The book describes the conventional Hazop as used in the process industry and an overview of the different Chazop frameworks guidelines suggested by engineers and researchers It then presents new Chazop methodology which is based on incident analysis The final chapter presents reasons for failures in computerized systems each of which is illustrated with an example Most of the examples did not cause an actual safety problem simply because they occurred within systems that are not safety related Some of these examples appear in the literature others are from personal experience or from private communications
