Engines Of Democracy:

Engines of Democracy Alan Rosenthal, 2008-10-07 State legislators have often been in the shadow of their national counterparts but they drive the processes of democracy Rosenthal brings together a lifetime of research and experience on state legislative politics into one eminently readable volume a dynamic inside view of the people involved the politics that prevail and the interest groups and lobbyists who advocate their causes Building on earlier work with new data and recent interviews and observations Rosenthal looks at the way representation works Americans critical view of their legislatures the role of legislative leaders the dynamics of executive legislative relationships as well as norms and ethics Both a complement and contrast to the policymaking process on Capitol Hill *Engines of Democracy* proves that no one gives insight into state legislators and their work the way Alan Rosenthal can *Engines of Democracy* Roger Burlingame, 1976 *Engines of Democracy* Roger Burlingame, 1940 *Historical Outlook*, 1918 *The Social Studies*, 1916 *History Teacher's Magazine*, 1918 **Governing States and Localities** Kevin B. Smith, Alan Greenblatt, 2016-11-30 The partisan and ideological polarization associated with federal government plagues states and localities too bringing with it significant implications for public policy and intergovernmental relations The trusted and proven *Governing States and Localities* guides students through these issues and continues its focus on the role economic and budget pressures play With their engaging journalistic writing and crisp storytelling Kevin B Smith and Alan Greenblatt employ a comparative approach to explain how and why states and localities are both similar and different in institutional structure culture history economy geography and demographics A great blend of high quality academic analysis and the latest scholarship the Sixth Edition is thoroughly updated to account for such major developments as state vs federal conflicts over immigration reform gun control and voter rights health and education reforms aimed at improving the effectiveness of state and local government service delivery and the lingering effects of the Great Recession *The Samaritan's Dilemma* Deborah Stone, 2008-07-01 Politics has become a synonym for all that is dirty corrupt dishonest compromising and wrong For many people politics seems not only remote from their daily lives but abhorrent to their personal values Outside of the rare inspirational politician or social movement politics is a wasteland of apathy and disinterest It wasn't always this way For Americans who came of age shortly after World War II politics was a field of dreams Democracy promised to cure the world's ills But starting in the late seventies conservative economists promoted self interest as the source of all good and their view became public policy Government's main role was no longer to help people but to get out of the way of personal ambition Politics turned mean and citizens turned away In this moving and powerful blend of political essay and reportage award winning political scientist Deborah Stone argues that democracy depends on altruism not self interest The merchants of self interest have divorced us from what we know in our pores we care about other people and go out of our way to help them Altruism is such a robust motive that we commonly lie cheat steal and break laws to do right by others After 3:30 you're a private citizen one home health aide told Stone explaining

why she was willing to risk her job to care for a man the government wanted to cut off from Medicare The Samaritan s Dilemma calls on us to restore the public sphere as a place where citizens can fulfill their moral aspirations If government helps the neighbors citizens will once again want to help govern With unforgettable stories of how real people think and feel when they practice kindness Stone shows that everyday altruism is the premier school for citizenship Helping others shows people their common humanity and their power to make a difference At a time when millions of citizens ache to put the Bush and Reagan era behind us and feel proud of their government Deborah Stone offers an enormously hopeful vision of politics

Deep Search Konrad Becker, Felix Stalder, 2009 Deep Search collects 13 texts which investigate the social and political dimensions of how we navigate the deep seas of knowledge. What do we win and what do we lose when we move from an analogue to a digital information order? How is computer-readable significance produced? How is meaning involved in machine communication? Where is the potential of having access to such vast amounts of information? What are the dangers of our reliance on search engines, and are there any approaches that do not follow the currently dominating paradigm of Google? This volume answers these questions of culture, context, and classification regarding information systems that should not be ignored.
