Downes,Paul Nunes,2014 It used to take years or even decades for disruptive innovations to dethrone dominant products and services But now any business can be devastated virtually overnight by something better and cheaper Software based products are replacing physical goods And every service provider must compete with cloud based tools that offer customers a better way to interact Today start ups with minimal experience and no capital can unravel your strategy before you even begin to grasp what s happening Never mind the innovator s dilemma This is the innovator s disaster And it s happening in nearly every industry The good news is that any business can master the strategy of the start ups In our summary of Big Bang Disruption Strategy in the Age of Devastating Innovation Larry Downes and Paul Nunes identify four key stages of the new innovation life cycle helping you spot potential disruptors in time And they offer twelve rules for defending your markets launching disruptors of your own and getting out while there s still time Back cover The End of the Everything Bubble

Alasdair Nairn,2011-10-26 There are crashes and then there are Crashes But what turns an ordinary downturn into an era defining crisis What makes the difference between an event like the Wall Street Crash of 1929 and a brief bear market The answer lies in financial exuberance speculative mania that appears to be making everyone rich only to end up making everyone much much worse off Historian and professional investor Alasdair Nairn predicted both the dotcom and subprime collapses and in this compelling new book shares the evidence that we are living through such a period of deadly excess right now Markets appear to be going up and up but they have got perilously ahead of themselves Danger lies in every single investable asset class What some have called the Everything Bubble has inflated to unprecedented proportions And now the bubble is about to burst Nairn lays bare the level of danger with unprecedented detail and pieces together the steps that brought us to the precipice Lastly he points out options open to those willing to act now to avoid future harm to their wealth As we near the end of the Everything Bubble don t be one of those caught out **Fundology** John

The Rise and Fall of the City of Money Ray Perman,2019-10-10 It started and ended with a financial catastrophe The Darien disaster of 1700 drove Scotland into union with England but spawned the institutions which transformed Edinburgh into a global financial centre The crash of 2008 wrecked the city s two largest and oldest banks and its reputation In the three intervening centuries Edinburgh became a hothouse of financial innovation prudent banking reliable insurance and smart investing The face of the city changed too as money transformed it from medieval squalor to Georgian elegance This is the story not just of the institutions which were respected worldwide but of the personalities too such as the two hard drinking Presbyterian ministers who founded the first actuarially based pension fund Sir Walter Scott who faced financial ruin but wrote his way out of it the men who financed American railways and eastern rubber plantations with Scottish money and Fred Goodwin notorious CEO of RBS who took the bank to be the biggest in the world but crashed and burned in 2008

Principles of Project and Infrastructure Finance Willie Tan,2007-05-10 Current books on project finance tend to be non technical and are either procedural or rely heavily on case studies In contrast this textbook provides a more analytical perspective without a loss of pragmatism Principles of Project and Infrastructure Finance is written for senior undergraduates graduate students and practitioners who wish to know how major projects such as residential and infrastructural developments are financed The approach is intuitive yet rigorous making the book highly readable Case studies are used to illustrate integration as well as to underscore the pragmatic slant

The Uncomfortable Truth About Money Paul Podolsky,2024-11-19 We are all stuck in a money cage Money isn t the most important thing but it is a thing and you can t get away from it Birth costs money and death costs money So even if you hate talking about money you need to know the basics the same way you need to know how to cook yourself a simple meal The problem with most money books is that they are not written by practitioners and

avoid hard truths What a weathered investor knows is that stocks are not always good for the long run They know that being stingy helps accrue wealth They know the big thing when you buy property has nothing to do with the property They know the big thing is less what happens to the markets in a day than if the entire system holds together And they know what to look for if it s time to pull out That s what this book will teach you a lifetime of money learnings distilled to a thin volume like a basic cooking recipe you can follow

Boom Byrne Hobart,Tobias Huber,2024-11-19 A timely investigation of the causes of technological and scientific stagnation and a radical blueprint for accelerating innovation Read this book for the alternative history of our age Peter Thiel investor and author of Zero to One A must read for those who seek to build the future Marc Andreessen cofounder of Netscape and Andreessen Horowitz From the Moon landing to the dawning of the atomic age the decades prior to the 1970s were characterized by the routine invention of transformative technologies at breakneck speed By comparison ours is an age of stagnation Median wage growth has slowed inequality and income concentration are on the rise and scientific research has become increasingly expensive and incremental Why are we unable to replicate the rate of progress of past decades What can we do to reinvigorate innovation In Boom Byrne Hobart and Tobias Huber take an inductive approach to the problem In a series of case studies tracking some of the most significant breakthroughs of the past 100 years from the Manhattan Project and the Apollo program to fracking and Bitcoin they reverse engineer how transformative progress arises
