Europe 1945-1990s Antonio Varsori, 2016-07-27 The book which is the outcome of an international conference held under the auspices of the University of Florence aims at sketching out through the contributions by distinguished scholars from various nationalities the origins and characteristics of the system which has been imposed on Europe between the end of the Second World War and the mid 1950s as well as at analysing the most important consequences of the events which from the fall of the Berlin Wall to the end of the cold war have radically transformed the European scene **The United States and the European Union** Terrence R. Guay, 2013-10-15 First Published in 2001 This book provides a concise yet thorough overview of the interactions between the world's dominant country and the world's most developed institution The book examines the major events in the history of US EU relations and suggests that changes in the international political economy play a key role in shaping this relationship the US and the EU are in a constant state of competition and cooperation that varies by issue and policy area The United States and the European Union is well suited for researchers interested in Europe's external relations US foreign policy political economy and contemporary global issues *The United States and the Nuclear Dimension of European Integration* G. Skogmar, 2004-09-15 The US was a dominant actor in the European integration game in the 1950s although not normally a formal participant at the negotiation table The Americans promoted integration based on Franco German reconciliation and sought to prevent the emergence of nationally controlled nuclear weapons in Germany and France and developments toward an independent European Third Force Based on material from American British French and German archives the book covers the negotiations about the European Defence Community the Western European Union and Euratom the Common Market *European Union History* W. Europe met in Paris On the same day in the same city the Exposition Universelle was launched to mark the achievements of capitalist production The two events symbolized the beginning of the epic struggle between socialism and capitalism in Europe In this comprehensive study of a century of socialism the author traces the fortunes of the political parties of the Left in Western Europe From the rise of the Bolsheviks to the fall of the Berlin wall from the Second International through two world wars to the Cold War and the birth of the welfare state from the working class militancy and student uprisings of the 1960s through the revival of feminism and the arrival of green politics to the reluctant embrace of market economics en route to the millennium Donald Sassoon charts the course of socialism across 14 countries He shows that throughout their history the fortunes of socialism and capitalism have been inextricably linked They have grown up side by side each one challenging and seeking to destroy yet nourishing and shaping the other

New Zealand, Britain, and European Integration Since 1960 Hamish McDougall, 2023-12-26 This book explores how New Zealand a small country almost as far from Western Europe as it is possible to be assumed political importance in Britain's accession to the European Community vastly out of proportion to its size proximity and strategic position At several points in accession negotiations the issue of

New Zealand's continued trade with Britain threatened to derail UK Government attempts to join the Community. This issue also interacted with the broader context of the Cold War economic shocks and decolonisation materially affecting the terms of entry into the European Community and altering Britain's relations with its European partners and the British public's perceptions of British membership. After entry, New Zealand continued to resurface as a continued source of tension between Britain and an integrating Europe. The role that New Zealand played sheds light on Britain's attempts to retain global influence after the demise of its formal empire. Contributing to a growing body of research which challenges the traditional historical narratives of British decline and colonial independence in the second half of the twentieth century, this book fills an important gap in the historiography of Britain following the 1973 enlargement of the European Communities. *Heath, Nixon and the Rebirth of the Special Relationship* Niklas H. Rossbach, 2009-11-19. This book reveals that 1969-74 was a crucial period for the special relationship. The Heath Government attempted to reverse Britain's decline as a great power by forging an American-European special relationship out of the Anglo-American relationship. Simultaneously, the Nixon Administration tried to recoup the global position of the United States.

World Views and Worldly Wisdom · Visions et expériences du monde Jan De Maeyer, Vincent Viaene, 2016-05-02. The attraction and repulsion between the Roman Catholic Church and modernity in Europe between 1750 and 2000. Emiel Lamberts, 1941. Professor emeritus of contemporary history at KU Leuven, is an international expert in the political and religious history of Europe in the 19th and 20th centuries. His work and the central themes in his research are the starting point in *World Views and Worldly Wisdom*. No less than eighteen leading international researchers put different aspects of his work in the spotlight. A recurring theme, however, is the attraction and repulsion between the Roman Catholic Church and modernity in Europe between 1750 and 2000. The ambivalent relationship with modernity is therefore the leitmotiv of the first part of this volume, whereas the second part focuses on the repositioning of the Church and the tensions between religion, ideology and politics. In this way, the volume reflects Lamberts's fascination for the history of political institutions as well as his research on Christian democracy. The contributions address, in a comparative way and from a transatlantic viewpoint, this broad period of time in history which gave rise to different social movements and different models of society in Belgium and elsewhere.
