

A photograph of a dirt road winding through a forest. The trees are covered in autumn foliage, with shades of orange, yellow, and brown. The road leads towards a bright, hazy light at the end of the path, creating a sense of depth and perspective. The overall mood is contemplative and serene.

Now this is not the end. It is not even
the beginning of the end. But it is,
perhaps, the end of the beginning.

Genesis, Science, and the Beginning Benjamin D. Smith, 2018-08-29 Christian apologist Ben Smith believes that the creation account in Genesis 1 can be read literally and historically as a real week of seven normal days without contradicting modern astronomy and geology regarding the age of the universe and Earth Many Christians are divided over how to reconcile Genesis with modern science and this book evaluates all of the major options ultimately concluding that the Bible allows for an old universe and Earth in a way that is also scientifically accurate A former Young Earth creationist Smith now believes that the age of creation is not specified in the Bible and therefore scientists are free to answer the question He believes that Christians should not hide from the controversy over the age of the Earth but should take a fresh look at the text and be impressed with its accuracy
