End Cosmic Catastrophe And The Fate Of The Universe:

End F. E. Close,1990 **End** F. E. Close,1988-01-01 **Apocalypse When?** F. E. Close,1988 Explores the nature of the universe and studies the potential risks to the earth from natural forces beyond the control of humankind as well as examining space colonization and the future evolution of the human race The Last Three Minutes Paul Davies,2008-08-05 Ragnarok Armageddon Doomsday Since the dawn of time man has wondered how the world would end In The Last Three Minutes Paul Davies reveals the latest theories It might end in a whimper slowly scattering into the infinite void Then again it might be yanked back by its own gravity and end in a catastrophic Big Crunch There are other more frightening possibilities We may be seconds away from doom at this very moment Written in clear language that makes the cutting edge science of quarks neutrinos wormholes and metaverses accessible to the layman The Last Three Minutes treats readers to a wide range of conjectures about the ultimate fate of the universe Along the way it takes the occasional divergent path to discuss some slightly less cataclysmic topics such as galactic colonization what would happen if the Earth were struck by the comet Swift Tuttle a distinct possibility the effects of falling in a black hole and how to create a baby universe Wonderfully morbid to the core this is one of the most original science books to come along in years **The Frontiers of Science & Faith** John Jefferson Davis,2002-01-01 What happens when new scientific research meets traditional Christian doctrines How does the big bang theory fit with Genesis 1 1 What does quantum mechanics have to do with the doctrines of predestination and the omniscience of God How does the anthropic principle square with a biblical notion of a designed and purposeful universe What are the implications of the doctrine of redemption in Jesus Christ for the search for extraterrestrial intelligence Addressing these and other questions John Jefferson Davis brings together a well informed understanding of current scientific issues with Christian teaching He demonstrates that the meeting of the frontiers of science with the frontiers of faith calls for a proper relationship with the God of the universe and a humility that acknowledges the fundamental limits of human knowledge BOOK JACKET Title Summary field provided by Blackwell North America Inc All Rights Reserved

Expanding Humanity's Vision Of God Robert Herrmann,2009-08-15 How has our understanding of our world and our place in the universe changed in recent decades through the momentous discoveries of science Do recent developments in the philosophy of science which place limitations on scientific knowing provide a more level playing field This collection of essays and sermons which have not been readily available before address these thought provoking questions The John Templeton Foundation sponsored an essay and sermon contest to convey an expanded vision of God one that is informed by recent discoveries of science on the nature of the universe and the place we have in the world These selections are the winners of that competition The book is divided into three sections Contemporary Science Raising Theological Questions New Visions of Theology and Historical and Philosophical Perspectives on the Science Religion Dialogue The essays cover such areas as physics theology cosmology origins and artificial intelligence There is another way to conceive our life together

There is another way to conceive of our life in God but it requires a different worldview not a clockwork universe in which individuals function as discrete springs and gears but one that looks more like a luminous web in which the whole is far more than the parts In this universe there is no such thing as an individual apart from his or her relationships Every interaction between people and people between people and things between things and things changes the face of history Life on earth cannot be reduced to four sure fire rules It is an ever unfolding mystery that defies precise prediction Meanwhile in this universe there is no such thing as parts The whole is the fundamental unit of reality Barbara Brown Taylor *Physics and Faith*

The Prophet and the Astronomer: Apocalyptic Science and the End of the World Marcelo Gleiser, 2003-07-17 An intellectual accomplishment that illuminates the magic and the wisdom of the heavens above Kirkus Reviews Tracing our contemplation of the cosmos from the big bang to the big crunch The New Yorker Marcelo Gleiser explores the shared quest of ancient prophets and today's astronomers to explain the strange phenomena of our skies from the apocalypse foretold in Revelations to modern science's ongoing identification of multiple cataclysmic threats including the impact of comets and asteroids on earthly life the likelihood of future collisions the meaning of solar eclipses and the death of stars the implications of black holes for time travel and the ultimate fate of the universe and time Presenting insights to cosmological science and apocalyptic philosophy in an easily accessible Library Journal style Gleiser is a rare astrophysicist as comfortable quoting Scripture as explaining formulas Booklist K C Cole praises his ability to work the entwined threads of science and religion into a vision of the end that is strangely comforting and inspiring

Literature 1989, Part 1 Astronomisches Rechen-Institut, 2013-11-11 From the reviews Astronomy and Astrophysics Abstracts has appeared in semi annual volumes since 1969 and it has already become one of the fundamental publications in the fields of astronomy astrophysics and neighbouring sciences It is the most important English language abstracting journal in the mentioned branches The abstracts are classified under more than a hundred subject categories thus permitting a quick survey of the whole extended material The AAA is a valuable and important publication for all students and scientists working in the fields of astronomy and related sciences As such it represents a necessary ingredient of any astronomical library all over the world Space Science Review Dividing the whole field plus related subjects into 108 categories each work is numbered and most are accompanied by brief abstracts Fairly comprehensive cross referencing links relevant papers to more than one category and exhaustive author and subject indices are to be found at the back making the catalogues easy to use The series appears to be so complete in its coverage and always less than a year out of date that I shall certainly have to make a little more space on those shelves for future volumes The Observatory Magazine

Creation and Complexity Christine Ledger, Stephen Pickard, 2004 Creation and Complexity are two themes that draw the sciences and theology together The remarkable advances of science in the modern period have opened up new knowledge and revealed

ever deepening layers of complexity in the world from the cosmic macro level to the micro world of quantum There seems no end to the rich tapestry of the cosmic order and process A science of complexity has been spawned The discoveries of the sciences have been matched in the twentieth century by a renewal in the doctrine of creation Behind this lies a renaissance in trinitarian thinking which offers fresh insight into the dynamic of God in creation past present and future The complexity of the triune God in creation find echoes in the rich complexity of the world uncovered by the contemporary sciences This book explores the nature of complexity in God s creation **Theories of Everything: Ideas in Profile** Frank

Close,2017-03-02 Physicist Frank Close takes the reader to the frontiers of science in a vividly told investigation of revolutionary science and enterprise from the seventeenth century to the present He looks at what has been meant by theories of everything explores the scientific breakthroughs they have allowed and shows the far reaching effects they have had on crucial aspects of life and belief Theories of everything he argues can be described as those which draw on all relevant branches of knowledge to explain everything known about the universe Such accounts may reign supreme for centuries Then often as a result of the advances they themselves have enabled a new discovery is made which the current theory cannot explain A new theory is needed which inspiration sometimes supplies Moving from Isaac Newton s work on gravity and motion in the seventeenth century to thermodynamics and James Clerk Maxwell s laws of electromagnetism in the nineteenth to Max Planck s and Paul Dirac s quantum physics in the twentieth Professor Close turns finally to contemporary physics and the power and limitations of the current theory of everything The cycle in which one theory of everything is first challenged and then replaced by another is continuing right now **Eternity and Time's Flow** Robert Cummings Neville,1993-07-01 Neville returns eternity to the center of consideration by analyzing the obsessive culture that attempts to get along denying it and he analyzes the nature of time s flow itself the nature of divine eternity and the subtle problems of personal immortality He argues that time and eternity constitute one topic and that therefore time itself is beyond understanding beyond personal grasp and beyond civilized orientation without a proper comprehension of eternity

The Rise of Animals Mikhail A. Fedonkin,2007 An essential resource for paleontologists biologists geologists and teachers The Rise of Animals is the best single reference on one of earth s most significant events **Time and the Shape of**

History P. J. Corfield,2007-01-01 In this lively comedy of love and money in sixteenth century Venice Bassanio wants to impress the wealthy heiress Portia but lacks the necessary funds He turns to his merchant friend Antonio who is forced to borrow from Shylock a Jewish moneylender When Antonio s business falters repayment becomes impossible and by the terms of the loan agreement Shylock is able to demand a pound of Antonio s flesh Portia cleverly intervenes and all ends well except of course for Shylock **Apocalyptic Fever** Richard G. Kyle,2012-08-01 How will the world end Doomsday ideas in Western history have been both persistent and adaptable peaking at various times including in modern America Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event The

views expressed in these polls have been reinforced by the market process Whether through purchasing paperbacks or watching television programs millions of Americans have expressed an interest in end time events Americans have a tremendous appetite for prophecy more than nearly any other people in the modern world Why do Americans love doomsday In *Apocalyptic Fever* Richard Kyle attempts to answer this question showing how dispensational premillennialism has been the driving force behind doomsday ideas Yet while several chapters are devoted to this topic this book covers much more It surveys end time views in modern America from a wide range of perspectives dispensationalism Catholicism science fringe religions the occult fiction the year 2000 Islam politics the Mayan calendar and more *The Prophet and the Astronomer* Marcelo Gleiser,2003 Gleiser explores the shared quest of ancient prophets and today s astronomers to explain the strange phenomena of our skies from the apocalypse foretold in Revelations to modern science s ongoing identification of multiple cataclysmic threats 37 illustrations [The Heavens Are Falling](#) Walter J. Karplus,2013-11-11 Each day we are bombarded with news of a new catastrophe of worldwide proportions promising to obliterate a part if not all of humankind Confronted with these warnings of impending doom our best defense is to understand how valid or invalid these predictions of calamity are By perceiving these threats in a wise and sagacious way we can best meet future challenges by not earmarking precious resources for wrong or misleading reasons Walter Karplus a professor of computer sciences at UCLA in his 35 years of experience has made predictions for all kinds of phenomena by generating models and computer simulations His decades of experience have taught him what we can and cannot predict with any accuracy Dr Karplus surveys the most hotly debated catastrophes that many scientists have predicted will imminently endanger the lives of countless people all over the globe These catastrophes include the depletion of the ozone layer the Greenhouse Effect nuclear radiation acid rain the AIDS epidemic the population explosion another Great Depression and earthquakes Drawing on his superb background he assesses the strengths and weaknesses of arguments propounding the seriousness of these calamities All the while he never allows us to lose sight of the profound shortcomings of scientific prediction In his singularly engaging manner Dr Karplus traces the fascinating art of prediction from our earliest ancestors to today He pronounces at what point prediction even within science becomes a black art He elucidates the problems that computer simulations have in predicting events and goes on to pinpoint when and where these models lapse into the area of pure conjecture Through reason and wit Walter Karplus teaches us how to bring a trained eye to the predictions of disaster that unceasingly assault us *The Heavens Are Falling* is an illuminating and entertaining work that bestows on us the wisdom to make informed judgments before taking arms against a sea of troubles [Chronicles of Humanity: An Encyclopedia of Time](#) Pasquale De Marco,2025-04-11 Journey through time and explore the extraordinary story of humanity in *Chronicles of Humanity An Encyclopedia of Time* From the origins of the universe to the present day this comprehensive volume delves into the major events fascinating people and groundbreaking ideas that have shaped our world Immerse yourself in the lives of iconic figures both renowned and unsung as you learn
