The British National Bibliography Arthur James Wells,2001 *The End of Empires and a World Remade* Martin Thomas,2024-03-19 A capacious history of decolonization from the decline of empires to the era of globalization Empires until recently were everywhere They shaped borders stirred conflicts and set the terms of international politics With the collapse of empire came a fundamental reorganization of our world Decolonization unfolded across territories as well as within them Its struggles became internationalized and transnational as much global campaigns of moral disarmament against colonial injustice as local contests of arms In this expansive history Martin Thomas tells the story of decolonization and its intrinsic link to globalization He traces the connections between these two transformative processes the end of formal empire and the acceleration of global integration market reorganization cultural exchange and migration The End of Empires and a World Remade shows how profoundly decolonization shaped the process of globalization in the wake of empire collapse In the second half of the twentieth century decolonization catalyzed new international coalitions it triggered partitions and wars and it reshaped North South dynamics Globalization promised the decolonized greater access to essential resources to wider networks of influence and to worldwide audiences but its neoliberal variant has reinforced economic inequalities and imperial forms of political and cultural influences In surveying these two codependent histories across the world from Latin America to Asia Thomas explains why the deck was so heavily stacked against newly independent nations Decolonization stands alongside the great world wars as the most transformative event of twentieth century history In The End of Empires and a World Remade Thomas offers a masterful analysis of the greatest process of state making and empire unmaking in modern history

Decolonising Europe? Berny Sébe,Matthew G. Stanard,2020-04-01 Decolonising Europe Popular Responses to the End of Empire offers a new paradigm to understand decolonisation in Europe by showing how it was fundamentally a fluid process of fluxes and refluxes involving not only transfers of populations ideas and sociocultural practices across continents but also complex intra European dynamics at a time of political convergence following the Treaty of Rome Decolonisation was neither a process of sudden rapid changes to European cultures nor one of cultural inertia but a development marked by fluidity movement and dynamism Rather than

being a static process where Europe's former metropolises and their peoples at home reacted to the end of empire out there decolonisation translated into new realities for Europe's cultures societies and politics as flows ebbs fluxes and cultural refluxes reshaped both former colonies and former metropolises The volume's contributors set out a carefully crafted panorama of decolonisation's sequels in European popular culture by means of in depth studies of specific cases and media analysing the interwoven meaning momentum memory material culture and migration patterns of the end of empire across eight major European countries The revised meaning of decolonisation that emerges will challenge scholars in several fields and the panorama of new research in the book charts paths for new investigations The question mark in the title asks not only how European cultures experienced the end of empire but also the extent to which this is still a work in progress
