Endangered Rivers And The Conservation Movement:

Endangered Rivers and the Conservation Movement Tim Palmer, 2004-01-29 Based on careful research and hundreds of interviews this information packed narrative is regarded as a classic in the field of conservation This updated edition includes two new chapters that chart the course of conservation during the past twenty years and explore how the movement to protect rivers will likely change in the twenty first century *Water Wars* Vandana Shiva, 2016-07-26 Acclaimed author and award winning scientist and activist Vandana Shiva lucidly details the severity of the global water shortage calling the water crisis the most pervasive most severe and most invisible dimension of the ecological devastation of the earth She sheds light on the activists who are fighting corporate maneuvers to convert the life sustaining resource of water into more gold for the elites and uses her knowledge of science and society to outline the emergence of corporate culture and the historical erosion of communal water rights Using the international water trade and industrial activities such as damming mining and aquafarming as her lens Shiva exposes the destruction of the earth and the disenfranchisement of the world s poor as they are stripped of rights to a precious common good Revealing how many of the most important conflicts of our time most often camouflaged as ethnic wars or religious wars are in fact conflicts over scarce but vital natural resources she calls for a movement to preserve water access for all and offers a blueprint for global resistance based on examples of successful campaigns Featuring a new introduction by the author this edition of *Water Wars* celebrates the spiritual and traditional role water has played in communities throughout history and warns that water privatization threatens cultures and livelihoods worldwide *The Third Force* Ann M. Florini, 2012-10-24 From the landmines campaign to the Seattle protests against the WTO to the World Commission on Dams transnational networks of civil society groups are seizing an ever greater voice in how governments run countries and how corporations do business This volume brings together a multinational group of authors to help policy makers scholars business people and activists themselves understand the profound issues raised Contributors include Fredrik Galtung Rebecca Johnson Sanjeev Khagram Chetan Kumar Motoko Mekata Thomas Risse P J Simmons and Yahya Dehqanzada **The Great Thirst** Norris Hundley Jr., 2023-11-15 The story of the great thirst is brought up to date in this revised edition of Norris Hundley s outstanding history with additional photographs and incisive descriptions of the major water policy issues facing California now accelerating urbanization of farmland and open spaces persisting despoliation of water supplies and demands for equity in water allocation for an exploding population People the world over confront these problems and Hundley examines them with clarity and eloquence in the unruly laboratory of California The obsession with water has shaped California to a remarkable extent literally as well as politically and culturally Hundley tells how aboriginal Americans and then early Spanish and Mexican immigrants contrived to use and share the available water and how American settlers arriving in ever increasing numbers after the Gold Rush transformed California into the home of the nation s preeminent water seekers The desire to use profit from manipulate

and control water drives the people and events in this fascinating narrative until by the end of the twentieth century a large colorful cast of characters and communities has wheeled and dealt built diverted and connived its way to an entirely different statewide waterscape The story of the great thirst is brought up to date in this revised edition of Norris Hundley's outstanding history with additional photographs and incisive descriptions of the major water policy issues facing California now accelerating urbanization

Characterization and Assessment of Economic Systems in the Interior Columbia Basin David L. Fluharty, 2000 **General Technical Report PNW-GTR**, 1999 *Restoring the Shining Waters* David Brooks, 2015-08-25

No sooner had the EPA established the Superfund program in 1980 to clean up the nation's toxic waste dumps and other abandoned hazardous waste sites than a little Montana town found itself topping the new program's National Priority List Milltown a place too small to warrant a listing in the U.S. Census sat alongside a modest hydroelectric dam at the confluence of the Clark Fork and Blackfoot Rivers For three quarters of a century arsenic-laced waste from some of the world's largest copper mining operations had accumulated behind the dam Soon Milltown became the site of Superfund's first dam removal and watershed restoration marking a turning point in U.S. environmental history The story of this dramatic shift is the tale of individuals rallying to reclaim a place they valued beyond its utility In *Restoring the Shining Waters* David Brooks gives an intimate account of how local citizens homeowners university scientists county health officials grassroots environmentalists business leaders and thousands of engaged residents brought about the removal of Milltown Dam Interviews with townspeople outside environmentalists mining executives and federal officials reveal how the everyday actions of individuals got the dam removed and in the process pushed Superfund to allow more public participation in decision making and to emphasize restoration over containment of polluted environments A federal program designed to deal with the toxic legacies of industrialization thus became a starting point for restoring America's most damaged environments largely through the efforts of local communities With curiosity conviction and a strong sense of place the small town of Milltown helped restore an iconic western river valley and in doing so shaped the history of Superfund and modern environmentalism

Native Waters Daniel McCool, 2006-10-26 Since the beginning of the reservation era the bitter conflict between Indians and non-Indians over water rights was largely confined to the courtroom But in the 1980s the federal government began to emphasize negotiated settlements over lawsuits and the settlements are changing water rights in fundamental ways not only for tribes but also for non-Indian communities that share scarce water resources with Indians In *Native Waters* Daniel McCool describes the dramatic impact these settlements are having both on Indian country and on the American West as a whole Viewing the settlements as a second treaty era he considers whether they will guarantee the water future of reservations or like treaties of old will require tribes to surrender vast resources in order to retain a small part of their traditional homelands As one tribal official observed It's like your neighbors have been stealing your horses for many years and now we have to sit down and decide how many of those horses they get to keep Unlike technical studies of

water policy McCool's book is a readable account that shows us real people attempting to end real disputes that have been going on for decades. He discusses specific water settlements using a combination of approaches from personal testimony to traditional social science methodology to capture the richness, complexity, and human texture of the water rights conflict. By explaining the processes and outcomes in plain language and grounding his presentation in relevant explanations of Indian culture, he conveys the complexity of the settlements for readers from a wide range of disciplines. *Native Waters* illustrates how America is coming to grips with an issue that has long been characterized by injustice and conflict, seeking to enhance our understanding of the settlements in the hope that this understanding will lead to better settlements for all parties. As one of the first assessments of a policy that will have a pervasive impact for centuries to come, it shows that how we resolve Indian water claims tells us a great deal about who we are as a nation and how we confront difficult issues involving race, culture, and the environment. *Saving the Saint Croix* Theodore J. Karamanski, 1993 **The Emerald Mile** Kevin

Fedarko, 2013-05-07 From one of *Outside* magazine's Literary All Stars comes the thrilling true tale of the fastest boat ride ever through the Grand Canyon atop the legendary Colorado River flood of 1983. In the spring of 1983, massive flooding along the length of the Colorado River confronted a team of engineers at the Glen Canyon Dam with an unprecedented emergency that may have resulted in the most catastrophic dam failure in history. In the midst of this crisis, the decision to launch a small wooden dory named *The Emerald Mile* at the head of the Grand Canyon, just fifteen miles downstream from the Glen Canyon Dam, seemed not just odd but downright suicidal. *The Emerald Mile*, at one time slated to be destroyed, was rescued and brought back to life by Kenton Grua, the man at the oars who intended to use this flood as a kind of hydraulic sling shot. The goal was to nail the all-time record for the fastest boat ever propelled by oar, by motor, or by the grace of God himself through the heart of the Grand Canyon atop the Colorado River from Lee's Ferry to Lake Mead. Did he survive? Just barely. Now this remarkable epic feat unfolds here in *The Emerald Mile*. **The History of Large Federal Dams** David P. Billington, Donald C. Jackson, Martin V. Melosi, 2005 Explores the story of Federal contributions to dam planning, design, and construction.

Gila Gregory McNamee, 2012-10-15 For sixty million years the Gila River, longer than the Hudson and the Delaware combined, has shaped the ecology of the Southwest from its source in New Mexico to its confluence with the Colorado River in Arizona. Today, for at least half its length, the Gila is dead, like so many of the West's great rivers, owing to overgrazing, damming, and other practices. This richly documented cautionary tale narrates the Gila's natural and human history. Now updated, McNamee's study traces recent efforts to resuscitate portions of this important riparian corridor. [The U.S.-Mexican Border Environment](#) Suzanne Michel, 2003 *Radical Ecology* Carolyn Merchant, 2012-10-02 This is a new edition of the classic examination of major philosophical, ethical, scientific, and economic roots of environmental problems, which examines the ways that radical ecologists can transform science and society in order to sustain life on this planet. It features a new Introduction from the author, a thorough updating of chapters, and two entirely new chapters on recent Global

Movements and Globalization and the Environment **Water Rights and the Environment in the United States** John R. Burch Jr., 2015-07-20 This sweeping study traces the development of water policy in the United States from the 19th century to the present day exploring the role of legislation in appropriating access to water to the American people Three factors influence the development of water policy and politics in the United States the availability of water the manner in which people use the commodity to its maximum economic benefit and governmental control This book is a one stop resource for understanding the scope of water issues in America from governing doctrine and legislation to Native American water rights to water protection and pollution and to the mitigation of natural and manmade disasters Distinguished author and noted scholar John R Burch Jr reviews the conflicts among state federal and international agencies in dealing with water supply and points to competing legal rulings and laws as undermining the creation of a cohesive policy for all Through an analysis of key documents Burch examines the recent calamities befalling the American water system including droughts oil spills and natural disasters and considers the future of water distribution to the American people Organized into six parts sections include doctrines and rights waters of the West border regions water management and flood control environmental issues and water supply and safety **Seek Higher Ground** Tim Palmer, 2024-04-02 Pairing in depth journalism with historical perspectives this book makes a compelling case for a natural solution to the growing problem of flooding With Seek Higher Ground environmental writer and former land use planner Tim Palmer explores the legacy of flooding in America taking a fresh look at the emerging climatic economic and ecological realities of our rivers and communities Global warming is forecast to sharply intensify flooding and this book urges that we reduce future damage in the most effective efficient and equitable ways possible Through historical narrative rigorous reporting and decades of vivid personal experience Palmer details how our society's approach to flood control has been infamously inadequate and chronically counterproductive He builds a powerful argument for both the protection of floodplain open space and for programs that help people voluntarily relocate their homes away from high water hazards Only by recognizing the indomitable forces of nature and adapting to them can we thrive in the challenging climate to come **Nixon and the Environment** J. Brooks Flippen, 2000-08-01 No one remembers Richard M Nixon as an environmental president but a year into his presidency he committed his administration to regulate and protect the environment The public outrage over the Santa Barbara oil spill in early 1969 culminating in the first Earth Day in 1970 convinced Nixon that American environmentalism now enjoyed extraordinary political currency No nature lover at heart Nixon opportunistically tapped the burgeoning Environmental Movement and signed the Endangered Species Act in 1969 and the National Environmental Protection Act in 1970 to challenge political rivals such as Senators Edmund Muskie and Henry Jackson As Nixon jockeyed for advantage on regulatory legislation he signed laws designed to curb air water and pesticide pollution regulate ocean dumping protect coastal zones and marine mammals and combat other problems His administration compiled an unprecedented environmental record but anti Vietnam

War protests outraged industrialists a sluggish economy the growing energy crisis and the Watergate upheaval drove Nixon to turn his back on the very programs he signed into law Only late in life did he re embrace the substantial environmental legacy of his tumultuous presidency *With Distance in His Eyes* Scott Raymond Einberger, 2018-04-16 One of America s most significant architects of conservation and the environment Stewart Udall comes to life in this environmental biography Perhaps no other public official or secretary of the interior has ever had as much success in environmental protection natural resource conservation and outdoor recreation opportunity creation as Udall A progressive Mormon born and raised in rural Arizona Udall served as the U S Secretary of the Interior under the presidential cabinets of John F Kennedy and Lyndon Baines Johnson from 1961 1969 During these eight years he established dozens of new national park units and national wildlife refuges wrote the Endangered Species Preservation Act lobbied for unpolluted water and offered ways to beautify urban spaces and bring the impoverished out of poverty Later in life he continued as an advocate for conservation and the environment specifically by proposing solutions to the challenges associated with global warming and the widespread use of oil What can we learn from this farsighted individual In a day and age of partisan politics poor congressional approval ratings and global warming and climate change this captivating biography offers a profound and historical record into Udall s life long devotion to environmental issues he cared about most deeply issues more relevant today than they were then Intimate moments include Udall s learning of the Kennedy assassination his push for civil rights for African Americans his meeting in the U S S R with Nikita Khrushchev the first Kennedy cabinet member to do so and his warnings about global warming 50 years prior to Al Gore s Nobel Prize winning film *Reclamation, Managing Water in the West, The Bureau of Reclamation: History Essays from the Centennial Symposium, Volume 2, 2008, **, 2009 **International commissions and the power of ideas** Editors: Ramesh Thakur, 2006
