All over the world, animals are becoming endangered. If an animal is endangered that means few animals of that species remain. If endangered animals are not protected, they sometimes become extinct.

Why are animals becoming endangered? Some animals are endangered **because of** poaching. Poaching is the illegal hunting of animals. In Africa, elephants are endangered because poachers kill elephants to get ivory. The ivory is very valuable.

Some animals are endangered **due to** pollution. In Asia, many river dolphins are endangered because humans dump waste water into the rivers. The waste water kills fish that dolphins eat and makes the dolphins sick.

Endangered Animals Brian Miller, Richard P. Reading, 2000-09-30 Explore the multiple issues that surround species declines and conservation efforts through the only reference source to examine the conflicting conservation issues of 49 endangered species While the causes of endangerment are relatively easy to understand the ultimate or underlying factors are often far more complex and difficult to address An introduction to these issues and how to resolve them is provided in this unique collection of case studies of animal species that have been pushed to the brink of extinction Each case study provides the following information Common name Scientific name Order Family Status Threats Habitat Distribution Natural history Conflicting Issues Future and Prognosis Conservationists are increasingly recognizing that the ultimate causes of extinction are primarily socio economic and political yet biological approaches to recovery continue to dominate More inclusive interdisciplinary conservation programs are explored here to offer better prospects for managing problems and conflicts In addition to the case studies trends and common themes are explored to provide a comprehensive interdisciplinary approach to conservation Students and teachers can explore a wide variety of endangered species programs and the conflicting issues common to recovery efforts which will enable them to evaluate conservation practice and to draw their own conclusions for improvement
