Prose Award for Archaeology and Anthropology      **Encyclopedia of Chinese History** Michael Dillon, 2016-12-01 China has become accessible to the west in the last twenty years in a way that was not possible in the previous thirty. The number of westerners travelling to China to study for business or for tourism has increased dramatically and there has been a corresponding increase in interest in Chinese culture, society and economy and increasing coverage of contemporary China in the media. Our understanding of China's history has also been evolving. The study of history in the People's Republic of China during the Mao Zedong period was strictly regulated and primary sources were rarely available to westerners or even to most Chinese historians. Now that the Chinese archives are open to researchers there is a growing body of academic expertise on history in China that is open to western analysis and historical methods. This has in many ways changed the way that Chinese history, particularly the modern period, is viewed. The *Encyclopedia of Chinese History* covers the entire span of Chinese history from the period known primarily through archaeology to the present day. Treating Chinese history in the broadest sense, the *Encyclopedia* includes coverage of the frontier regions of Manchuria, Mongolia, Xinjiang and Tibet that have played such an important role in the history of China. Proper and will also include material on Taiwan and on the Chinese diaspora. In A-Z format with entries written by experts in the field of Chinese Studies, the *Encyclopedia* will be an invaluable resource for students of Chinese history, politics and culture.

*Women, Gender and Rural Development in China* Tamara Jacka, Sally Sargeson, 2011 China's countryside is being transformed by rapid far-reaching development. This wide-reaching and multidisciplinary book questions whether gender politics are changing in response to this development and explores how gender politics inform and are reproduced or reconfigured in the languages, knowledge processes and practices of development in rural China. The contributors, prominent scholars in the fields of political science, sociology, gender development and Chinese studies, argue that although gender has been elided in recent development policies, women have been singled out as a vulnerable group requiring protection, instruction and empowerment from paternalistic state and NGOs. Nevertheless, development has facilitated the dissemination of gender equality as an ideal and institutional norm, increased the channels through which women can advance claims for equal rights and expanded the possibilities for agency available to them. Drawing on extensive field research in sites across China, from remote communities in Inner Mongolia and Guizhou to the fringes of expanding cities, the contributors illustrate how different women are bringing their own aspirations for development to bear in the momentous changes occurring in rural China. This compelling and thought-provoking book will be of interest to scholars, students and researchers in the fields of public and social policy, sociology, political economy, anthropology, gender and development.
