D'Onofrio, Paola Capelli, Paolo Pederzoli, 2014-11-18 Although interest in pancreatic pathology is very high in the radiological and gastroenterological communities it is still the case that less is known about pathology of the pancreas than about liver pathology for example Diagnosis depends on the structure of the pancreatic lesion which can be directly visualized on US CT or MR images This atlas which encompasses both the imaging and the pathology of pancreatic neoplasms will therefore be invaluable in enabling radiologists and sonographers to understand the underlying pathology and in allowing pancreatic pathologists to understand the imaging translation The emphasis in the atlas is very much on the pathological and imaging appearances with most of the text concentrated at the beginning of the chapters A comprehensive overview is provided of typical and atypical presentations and diverse aspects of common and uncommon pancreatic neoplasms including ductal adenocarcinoma neuroendocrine neoplasms intraductal papillary mucinous neoplasms cystic neoplasms metastases and lymphoma **Neuroendocrine Tumors** Jordan M. Cloyd, Timothy M. Pawlik, 2021-01-04 This book is a comprehensive state of the art definitive reference for the surgical management of Neuroendocrine Tumors NETs It provides a practical clinically useful guide that prioritizes the diagnostic work up indications for surgery surgical principles and perioperative care of

patients with NETs in the context of multi disciplinary care Most textbooks on NETs have traditionally focused on patients with advanced disease highlighting systemic therapies and emerging treatment options In contrast this book provides a concise yet comprehensive summary of the surgical management of NETs and serves as an invaluable resource for physicians fellows and residents who treat this difficult disease by providing helpful guidelines and up to date information on clinical management Written by experts in the field Neuroendocrine Tumors includes the most up to date clinical information from national and international leaders in their respective disciplines It not only serves as an invaluable resource for many as they seek to provide the best possible surgical and multidisciplinary cancer care but also an opportunity to identify new avenues of scientific discovery that may lead to significant advances in the diagnosis and management of NETs **Rare Endocrine**
