Energy Structures And Environmental Futures:

Energy Structures and Environmental Futures Torleif Haugland, Helge Ole Bergesen, Kjell Roland, 1998 This book examines the history and prospects of the European energy sector for the last twenty five and the next twenty five years The authors analysis is rooted in a careful examination of the factors that have shaped energy in Europe over the last quarter century its regulatory systems its corporate structures and its regulatory and environmental structures They conclude that whatever major changes may occur the structures of the twentieth century are not going to yield easily to economic internationalization nor to political environmentalism **Energy and the Politics of the North Atlantic** George A.

Gonzalez, 2013-01-01 Documents how energy resource acquisition has been the driving motivator for European and American international relations Ecological Public Health Geof Rayner, Tim Lang, 2013-06-19 What is public health To some it is

about drains water food and housing all requiring engineering and expert management To others it is the State using medicine or health education and tackling unhealthy lifestyles This book argues that public health thinking needs an overhaul a return to and modernisation around ecological principles Ecological Public Health thinking outlined here fits the twenty first century s challenges It integrates what the authors call the four dimensions of existence the material biological social and cultural aspects of life Public health becomes the task of transforming the relationship between people their circumstances and the biological world of nature and bodies For Geof Rayner and Tim Lang this is about facing a number of long term transitions some well recognized others not These transitions are Demographic Epidemiological Urban Energy Economic Nutrition Biological Cultural and Democracy itself The authors argue that identifying large scale transitions such as these refocuses public health actions onto the conditions on which human and eco systems health interact Making their case Rayner and Lang map past confusions in public health images definitions and models This is an optimistic book arguing public health can be rescued from its current dilemmas and frustrations This century s agenda is unavoidably complex however and requires stronger and more daring combinations of interdisciplinary work movements and professions locally nationally and globally Outlining these in the concluding section the book charts a positive and reinvigorated institutional purpose *Energy, the Modern State, and the American World System* George A. Gonzalez, 2018-03-01 Energy and the

modern state The political economy of energy Urban sprawl in the U S and the creation of the Hitler regime Urban sprawl the Great Depression and the start of World War II U S economic elites nuclear power and solar energy Global oil politics Plutonium and U S foreign policy Conclusion energy and the global order **Energy And Environmental Studies For The**

Near Future Azim Doğuş TUNCER, Bekir Can LÜTFÜOĞLU, Afşin GÜNGÖR, Onur KARAMAN, 2019-10-10 **American Empire and the Canadian Oil Sands** George A. Gonzalez, 2016-04-08 Throughout the US oil and gas shale are being hydrofracked to produce petroleum and natural gas Oil or tar sands from Canada is being processed thereby generating large amounts of crude This book places the unconventional fossil fuels revolution that is taking place in North America

within the context of great power politics Energy and Empire George A. Gonzalez, 2012-09-01 What set the United States on the path to developing commercial nuclear energy in the 1950s and what led to the seeming demise of that industry in the late 1970s Why in spite of the depletion of fossil fuels and the obvious dangers of global warming has the United States moved so slowly toward adopting alternatives In Energy and Empire George A Gonzalez presents a clear and concise argument demonstrating that economic elites tied their advocacy of the nuclear energy option to post 1945 American foreign policy goals At the same time these elites opposed government support for other forms of energy such as solar that cannot be dominated by one nation While researchers have blamed safety concerns and other factors as helping to arrest the expansion of domestic nuclear power plant construction Gonzalez points to an entirely different set of motivations stemming from the loss of America's domination control of the enrichment of nuclear fuel Once foreign countries could enrich their own fuel civilian nuclear power ceased to be a lever the United States could use to economically politically dominate other nations Instead it became a major concern relating to nuclear weapons proliferation **Envisioning Our Environmental Future**

B.H. Desai, 2022-09-09 With the Stockholm 50 Conference held on 23 June 2022 the global movement to protect the environment has reached a 50 year milestone The first UN Conference on the Human Environment also held in Stockholm from 5-16 June 1972 proved to be the watershed in addressing this problem and as the world assembles once more in the Swedish capital it is time to think aloud and look ahead In his address in 1972 the then Swedish Prime Minister Olof Palme said The decisive question is in which direction we will develop there is no individual future neither for people nor for nations The only other head of government to attend in 1972 Indian Prime Minister Indira Gandhi highlighted the development as one of the primary means of improving the environment of living of providing food water sanitation and shelter of making the deserts green and mountains habitable and drew attention to the wisdom of the Atharva Veda What of thee I dig out Let that quickly grow over Let me not hit thy vitals or thy heart As we look back over 50 years we need to assess what has gone wrong in the trajectory travelled so far and look ahead to the future of our environment at this juncture and beyond As a scholarly journal for global decision makers Environmental Policy and Law has sought to envision what lies ahead in the 21st century by inviting outstanding scholarly works from around the world The 22 articles which resulted from this invitation are presented in this book Envisioning Our Environmental Future which is organised in three parts Testing Times Global Ideas and Sectoral Ideas The book is a sequel to Our Earth Matters IOS Press which was published on 5 June 2021 Bharat H Desai is Professor of International Law and Jawaharlal Nehru Chair in International Environmental Law at the Centre for International Legal Studies School of International Studies of Jawaharlal Nehru University New Delhi He is Editor in Chief of the global journals Environmental Policy and Law Amsterdam IOS Press and Yearbook of International Environmental Law Oxford Oxford University Press Prof Desai's ideas and proposals are reflected in his published books and in journals of international repute **Energy Hedging in Asia: Market Structure and Trading Opportunities** P. Fusaro, T.

James,2005-08-02 This book focuses on the latest developments in the Asia Pacific community in terms of how deregulation and privatization are bringing more risk to energy companies In the light of these market changes interest in energy risk management has grown substantially and is becoming a fiduciary responsibility of energy companies As energy trading power exchanges and hedging techniques establish themselves in the oil power and gas sectors so then do newer derivatives markets emerge in LNG hedging weather derivatives and freight hedging Fusaro and James as seasoned market practitioners in the region focus on these market changes and examine the future of Asian energy hedging **Energy Economics, Finance, and Management in Developing and Emerging Economies** Hooi Hooi Lean,Jin Hooi Chan,2025-09-15 Energy Economics Finance and Management in Developing and Emerging Economies provides a comprehensive exploration of how developing nations can navigate the challenges of energy transition while managing scarce resources With a focus on practical strategies the book delves into economic frameworks financing mechanisms and management practices tailored for emerging economies By addressing the interplay between global energy dynamics and local constraints it equips policymakers researchers and industry professionals with actionable insights to foster sustainable development and economic resilience The book also emphasizes the critical role of innovation community engagement and international collaboration highlighting case studies best practices and adaptable solutions designed for diverse socio economic contexts Provides fresh and essential insights into the needs of developing and emerging economies in the energy transition Breaks down opportunities regulatory tactics and financial incentives for renewable and sustainable energy sources Includes a wide range of case studies from experts across the globe *The Future of Energy Efficiency in Post-COVID-19 Era* Muhammad Mohsin,Yu Hao,Abdul Khaliq Rasheed,Muhammad Irfan,FengSheng Chien,2025-02-10 The COVID 19 pandemic has led several governments to impose movement control resulting in serious challenges towards the research development and commercialization of sustainable energy generation and conversion technologies As a result of the economic slowdown in many parts of the world the poor are in distress Experts believe that a fast recovery from the COVID 19 epidemic or any future disaster will need clean and sustainable energy However questions arise on what type of renewable energy technologies will ensure our resilience in the face of future disasters like COVID 19 that aids rebuilding economies and puts nations on track to meet global climate and sustainable development goals Therefore this Research Topic primarily aims at compiling recent progress on energy generation conversion and resource utilization that would help resolve energy problems amidst and post Covid 19 pandemic *Cities for Smart Environmental and Energy Futures* Stamatina Th. Rassia,Panos M. Pardalos,2013-08-15 Cities for Smart Environmental and Energy Futures presents works written by eminent international experts from a variety of disciplines including architecture engineering and related fields Due to the ever increasing focus on sustainable technologies alternative energy sources and global social and urban issues interest in the energy systems for cities of the future has grown in a wealth of disciplines Some of the special features of this book include new findings on the

city of the future from the macro to the micro level These range from urban sustainability to indoor urbanism and from strategies for cities and global climate change to material properties The book is intended for graduate students and researchers active in architecture engineering the social and computational sciences building physics and related fields

Affecting Energy Efficiency ,2001 *Future Directions in Energy Engineering* Xiaolin Wang,2024-08-01 *Future Directions in Energy Engineering* Challenges Opportunities and Sustainability presents new advances and research results in theoretical experimental and practical sustainable energy engineering Contributions cover case studies to explore and analyze technological advancements alongside practical applications to help readers better understand the relevant concepts and solutions necessary to achieve clean energy and sustainable development The book brings together the latest developments in the emerging areas of intelligent power systems green energy and technology Coverage includes Electric power generation transmission and distribution Power system economics operation and control Energy storage and cybersecurity for smart grids Energy efficiency in building designs and management Sustainable materials for buildings Integration of renewable energy sources in buildings Greening urbanization and urban settlements The book offers approaches to help engineers and researchers in sustainable energy engineering technologies solve practical problems affecting their daily work

Building Futures Jane Powell,Jennifer Monahan,Chris Foulds,2015-11-24 A reduction in the energy demand of buildings can make a major contribution to achieving national and international carbon reduction goals in addition to addressing the interlinked issues of sustainable development fuel poverty and fuel security Despite improvements in thermal efficiency the energy demand of buildings stubbornly remains unchanged or is only declining slowly due to the challenges posed by growing populations the expectations of larger more comfortable and better equipped living spaces and an expanding commercial sector *Building Futures* offers an interdisciplinary approach to explore this lack of progress combining technical and social insights into the challenges of designing constructing and operating new low energy buildings as well as improving the existing inefficient building stock The twin roles of energy efficiency which is predominantly concerned with technological solutions and energy conservation which involves changing peoples behaviour are both explored The book includes a broad geographical range and scale of case studies from the UK Europe and further afield including Passivhaus in Germany and the UK Dongtan Eco City in China and retrofit houses in Denmark This book is a valuable resource for students and academics of environmental science and energy based subjects as well as construction and building management professionals

Future Energy Trevor Letcher,2008-07-30 *Future Energy* will allow us to make reasonable logical and correct decisions on our future energy as a result of two of the most serious problems that the civilized world has to face the looming shortage of oil which supplies most of our transport fuel and the alarming rise in atmospheric carbon dioxide over the past 50 years resulting from the burning of oil gas and coal and the loss of forests that threatens to change the world s climate through global warming *Future Energy* focuses on all the types of energy available to

us taking into account a future involving a reduction in oil and gas production and the rapidly increasing amount of carbon dioxide in our atmosphere It is unique in the genre of books of similar title in that each chapter has been written by a scientist or engineer who is an expert in his or her field The book is divided into four sections Traditional Fossil Fuel and Nuclear Energy Renewable Energy Potentially Important New Types of Energy New Aspects to Future Energy Usage Each chapter highlights the basic theory and implementation scope problems and costs associated with a particular type of energy The traditional fuels are included because they will be with us for decades to come but we hope in a cleaner form The renewable energy types includes wind power wave power tidal energy two forms of solar energy bio mass hydroelectricity geothermal and the hydrogen economy Potentially important new types of energy include pebble bed nuclear reactors nuclear fusion methane hydrates and recent developments in fuel cells and batteries Written by experts in the key future energy disciplines from around the globe Details of all possible forms of energy that are and will be available globally in the next two decades Puts each type of available energy into perspective with realistic future options *Energy Research Abstracts* ,1994 *The Sociology of Energy, Buildings and the Environment* Simon Guy,Elizabeth Shove,2014-02-04 Bringing the social sciences to the heart of environmental debate this book demonstrates the relevance of sociological analysis for environmentally critical issues like energy consumption Focusing on energy efficiency and the built environment the authors take a critical look at the production and use of technical knowledge and energy related expertise Challenging the conventional assumptions of scientists and energy policy makers the book outlines a new role for social research and a new paradigm for environmental policy **Choosing Our Environment: Futures analysis and the environment** United States. Congress. Senate. Committee on Public Works. Panel on Environmental Science and Technology,1976 *Distributed Energy Systems in California's Future* ,1978
