Energy Developments in the Middle East Anthony H. Cordesman, 2004-09-30 The Middle Eastern and North African region MENA dominates world energy exports today and will likely do so for decades to come even if world consumers make steady progress in conservation renewable energy sources and increases from gas coal and nuclear power The MENA region however has been the scene of both internal crises and external conflicts On several occasions these crises have affected either the flow of MENA energy exports or the development of energy production and export capacity The politics economics and social dynamics that shape threats to regional stability are complex Cordesman details the factors behind these diverse forces and outlines current supply levels and future trends taking each of these variables into consideration The MENA area includes at least 22 states with a combined population of nearly 300 million each with different political economic demographic and security conditions and needs It is divided into at least four sub regions including the Maghreb Mauritania Morocco Algeria Libya and Tunisia the Levant and the Arab Israeli confrontation states Egypt Israel Jordan Lebanon and Syria the Gulf Iran Iraq Kuwait Bahrain Qatar Saudi Arabia the UAE and Oman and the Red Sea states Yemen the Sudan and Somalia This important guide outlines the forces affecting each sub region including supply demand and financing and forecasts the likely impact that different scenarios would have on energy resources under varying world conditions Wind Energy Developments in the 20th Century, 1981 *Energy Development in the Southwest* Walter O.
