Energy Efficiency in the Steel Industry with Emphasis on Developing Countries Maurice Y. Meunier, Oscar De Bruyn Kops, 1984 **Energy in Developing Countries** ,1991 **Energy in the Developing Countries** ,1980 **China's Energy Strategy** Xiannuan Lin, 1996-01-19 China has reduced the energy intensity of its economy dramatically This book explores how this reduction was achieved and determines the major sources of energy savings Using extensive data the author examines the impacts of technological and structural changes on energy consumption and identifies the factors that were primarily responsible for the energy efficiency improvements It is an interesting work that will be useful for policy makers in assessing the energy consequences of development strategies and for economists in analyzing the relationship between energy use and economic growth Fueling Development United States. Congress. Office of Technology Assessment, 1992 **Energy And Environment In The Transition Economies** William Chandler, 2018-02-13 Energy and environmental issues in the former Soviet sphere rank as global policy priorities for three reasons First civilian application of military nuclear materials multiplies the threat of terrorism Second Russian and Caspian oil resources affect world markets Western energy security and regional stability Third climate change may become a global challenge commensurate with the Cold War and the transition economies the former Soviet Union and Eastern Europe offer the world s largest and cheapest near term opportunities for curbing greenhouse gas emissions Yet the region remains unprepared to deal with these issues and Western assistance has failed to help A second generation of reform efforts is needed led from within but supported by the West In *Energy and Environmental Policies in the Transition Economies* William Chandler synthesizes disparate specialized analyses and publications He draws on a relatively large body of research on energy technology oil and gas markets geopolitics finance economic reform and environmental science specific to Russia eastern Europe and the transition economies In successive chapters Chandler reviews energy use energy efficiency nuclear safety and security petroleum geoeconomics coal utility monopoly and competition and environmental and climatic change in the former Soviet Union and Central and Eastern Europe Chandler also considers options for a second generation of reform efforts The subject matter of the book is significant not only for the energy and environmental policies themselves important though they are but because those policies in turn affect regional political stability and Western energy security *Energy and Environmental Policies in the Transition Economies* will be of considerable interest to policymakers in government to private sector actors to academic scholars and to students of international energy and environmental politics Energy Abstracts for Policy Analysis ,1986

[The Hartwell Approach to](#)

Climate Policy Steve Rayner, Mark Caine, 2014-09-19 The Hartwell Approach to Climate Policy presents a powerful critique of mainstream climate change policies and details a set of pragmatic alternatives based on the Hartwell Group's collective writings from 1988-2010. Drawing on a rich history of heterodox but increasingly accepted views on climate change policy, this book brings together in a single volume a series of key related texts that define the Hartwell critique of conventional climate change policies and the Hartwell approach to building more inclusive pragmatic alternatives. This book tells of the story of how and why conventional climate policy has failed and drawing from lessons learned how it can be renovated. It does so by weaving together three strands of analysis. First, it highlights why the mainstream approach as embodied by the Kyoto Protocol has failed to produce real world reductions in greenhouse gas emissions and delayed real meaningful progress on climate change. Second, it explores the underlying political, economic, and technological factors which form the boundary conditions for climate change policy but which are often ignored by policy makers and advocates. Finally, it lays out a novel approach to climate change guided centrally by the goal of uplifting human dignity worldwide and the recognition that this can only succeed if pursued pragmatically, economically, and with democratic legitimacy. With contributions from leading scholars in the field, this work presents a original critique of climate policy and a constructive primer for how to improve it.
