*Intelligence Systems in Environmental Management: Theory and Applications* Cengiz Kahraman, İrem Uçal

Sari, 2016-09-03 This book offers a comprehensive reference guide to intelligence systems in environmental management. It provides readers with all the necessary tools for solving complex environmental problems where classical techniques cannot be applied. The respective chapters, written by prominent researchers, explain a wealth of both basic and advanced concepts, including ant colony genetic algorithms, evolutionary algorithms, fuzzy multi-criteria decision-making tools, particle swarm optimization, agent-based modelling, artificial neural networks, simulated annealing, Tabu search, fuzzy multi-objective optimization, fuzzy rules, support vector machines, fuzzy cognitive maps, cumulative belief degrees, and many others. To foster a better understanding, all the chapters include relevant numerical examples or case studies. Taken together, they form an excellent reference guide for researchers, lecturers, and postgraduate students pursuing research on complex environmental problems. Moreover, by extending all the main aspects of classical environmental solution techniques to its intelligent counterpart, the book presents a dynamic snapshot on the field that is expected to stimulate new directions and stimulate new ideas and developments. **Clean Energy Investments for Zero Emission Projects** Hasan Dinçer, Serhat

Yüksel, 2022-08-31 This contributed volume analyses and discusses how atmospheric carbon emissions can be prevented using carbon capture and removal technology and how renewable energies can be used to reduce carbon emissions. Both

approaches have their disadvantages First of all both involve high costs Secondly both require the use of advanced technology As a result many countries continue to use fossil fuels The book seeks to address these problems by identifying strategies to increase countries use of clean energy The authors discuss the dilemmas of zero emission and competition in the energy industry and illustrate cross country applications of the current trends in the form of zero emission business projects
