Executive Office of the President. Energy Policy and Planning, 1977 Energy Policy Planning B. A. Bayraktar, 2012-12-06 The Advanced Research Institute ARI on The Application of Systems Science to Energy Policy Planning was held under the auspices of the NATO Special Programme Panel on Systems Science in collaboration with the National Center for Analysis of Energy Sys tems Brookhaven National Laboratory USA as a part of the NATO Science Committee s continuous effort to promote the advancement of science through international cooperation Advanced Research Institutes are sponsored by the NATO Science Committee for the purposes of bringing together senior scientists to seek consensus on an assessment of the present state of knowl edge on a specific topic and to make recommendations for future research directions Meetings are structured to encourage inten sive group discussion Invitees are carefully selected so that the group as a whole will contain the experience and expertise neces sary to make the conclusions valid and significant A final report is published presenting the various viewpoints and conclusions The NATO Systems Science Panel noted that the systems approach is increasingly being applied to energy policy analysis and plan ning in both public and private sectors of national economies Consequently it seemed appropriate at this time to bring together experts to review and evaluate recent experience in order to iden tify strengths and weaknesses in current prac tice and to make recommendations for research directions **Implementing a Long-Term Energy Policy Planning Process for Azerbaijan** International Energy Agency, 2022 Long term energy planning is central to a country s strategic direction Without it governments may end up relying on a patchwork of policies and legislation that can be incoherent and ill suited for the complex challenges countries are increasingly faced with Good long term energy planning encompasses domestic and foreign policy while touching on many key areas of the economy including industry natural

resources and trade The process involves multiple stakeholders across the government but also brings in the private sector as well as citizens as it aims to set out a strategic path towards a clear goal Azerbaijan like many of its peers is looking to understand how best to meet the opportunities and complexities of the global clean energy transition The 2014 2015 oil shock prompted the government to consider and draft a slate of new laws and reform packages and at present efforts are being made to finalise and pass an energy strategy The price volatility seen in global markets over 2020 2022 is making it even clearer that energy planning using scenario analysis and modelling will help countries successfully respond to new and unexpected challenges in a resilient fashion This roadmap details the necessary steps in building that process and exploring relevant policy options that producer economies have pursued which may be relevant to Azerbaijan It then discusses data collection and survey design which are key to establishing the base for energy modelling The roadmap then looks at energy modelling and its role in policy making This roadmap aims to help Azerbaijan reconsider the policy planning process as it looks to connect key laws and reforms into a greater energy strategy It also sets out a path for Azerbaijan to make this process sustainable and iterative connecting its policymakers with its statisticians and investing in in house modelling capacity Every country must choose its own energy path based on its specific needs and resources but having a long term plan can smooth out that path significantly
