Gender And Social Theory Evans, Mary, 2003-02-01 What is the most significant aspect of current literature on gender How does this literature engage with social theory How does the recognition of gender shift the central arguments of social theory We know that gender defines and shapes our lives The question addressed by Gender and Social Theory is that of exactly how this process occurs and what the social consequences and the consequences for social theory might be The emergence of feminist theory has enriched our understanding of the impact of gender on our individual lives and the contemporary social sciences all recognise gender differentiation in the social world The issue however which this book discusses is the more complex question of the extent to which social theory is significantly disrupted disturbed or devalued by the fuller recognition of gender difference We know that gender matters but Mary Evans examines whether social theory is as blind to gender as is sometimes argued and considers the extent to which a greater awareness of gender truly shifts the concerns and conclusions of social theory Written by an author with an international reputation this is an invaluable text for students and an essential reference in the field

Cultural Gerontology Lars Andersson, 2002-11-30 The concept of culture has gained considerable attention within the humanities and social sciences in general and this is certainly true in the field of gerontology The new perspectives thus gained widen the scope of gerontology In this study chapter authors examine the growth of gerontology as a discipline the phenomenon of ageism as a socio cultural concept identity politics in which older persons are perceived as belonging to a subculture and images of the older body in cultural perspective The manner in which gerontology emerged as a discipline was embedded in culturally defined views of aging that had consequences for how it was seen to vary between cultures One consequence was a perception of ageism as a cultural construction Since the 1980s much of the politics of older people is a form of identity politics in which groups are mobilized to further their interests Questions of cultural meanings ascribed to the gendered aging body is a central question for ageism social identity and self image These questions become especially relevant in confrontations with bodily decline and negotiations of intimacy in institutions for older people

Migration, Gender and National Identity Ana Bravo-Moreno, 2006 This book examines the effects of international migration on the shaping of national and gender identities of Spanish women who migrated to the UK between the 1940s and the 1990s from different socio economic educational backgrounds and generations It explores the dynamics between the power of social institutions and women s agency in shaping their identities in two different countries Spain and the UK In looking at individuals formation of identities the complexity of the social sites of different social classes educational attainments and generations is illuminated This study looks at how gender and nation are appropriated in women s accounts and how representations of gender and nation relate to other significant social phenomena Differences in empirical realities are mirrored in respondents accounts In examining their lives this study shows the tension between the power of institutions which were created under particular historical economic and social conditions and women s appropriation of institutional discourses in their identities This book argues throughout that while it is important not to ignore the power of political and economic forces and history as contributors to women s formation of identities it is at least as important to think of identity as an individual appropriation and creation of individual meanings

Working Hard and Making Do Margaret K. Nelson, Joan Smith, 1999-05-24 The economic recovery of the 1990s brought with it a surge of new jobs but the prospects for

most working Americans improved little Family income rose only slightly and the period witnessed a significant degradation of the quality of work as well as in what people could expect from their waged employment In this book Margaret K Nelson and Joan Smith take a look inside the households of working class Americans to consider how they are coping with large scale structural changes in the economy specifically how the downgrading of jobs has affected survival strategies gender dynamics and political attitudes Drawing on both randomly distributed telephone surveys and in depth interviews Nelson and Smith explore the differences in the survival strategies of two groups of working class households in a rural county those in which at least one family member has been able to hold on to good work a year round full time job that carries benefits and those in which nobody has been able to secure or retain steady employment They find that households with good jobs are able to effectively use all of their labor power they rely on two workers they engage in on the side businesses and they barter with friends and neighbors In contrast those living in families without at least one good job find themselves considerably less capable of deploying a complex multi faceted survival strategy The authors further demonstrate that this difference between the two sets of households is accompanied by differences in the gender division of labor within the household and the manner in which individuals make sense of and respond to their employment *Autonomy and Identity* Ros Hague,2011-04-06

Autonomy and Identity are key concepts in both political and feminist thought and have played central roles in both fields Although there has been much academic work on both concepts there has arguably been little that has addressed the connections between autonomy and identity *Autonomy and Identity* seeks to draw innovative links between these concepts in order to develop a new understanding which sees autonomy as a process by which we change and develop our identity It draws on thinkers from the canon of political thought such as G W F Hegel Mary Wollstonecraft J S Mill and Simone de Beauvoir and features illustrative examples drawn from a wide range of contemporary issues including pornography domestic violence and women s citizenship Hague argues that identity is best understood as changing multiple and something we need to take control of ourselves In order to support this version of identity there needs to be a concept of autonomy which emphasises self direction to control our identity Providing valuable insight into the complexities of thinking about linking autonomy to identity this book will be of interest to students and scholars of political science gender studies contemporary political thought and the history of political thought *Bauman and contemporary sociology* Ali

Rattansi,2017-08-01 This is the first single authored critical engagement with the major works of Zygmunt Bauman Where previous books on Bauman have been exegetical here an unwavering light is shone on key themes in the sociologist s work exposing serious weaknesses in Bauman s interpretations of the Holocaust Western modernity consumerism globalisation and the nature of sociology The book shows how Eurocentrism the neglect of issues of gender and a lack of awareness of the racism faced by Europe s non white ethnic minorities seriously limit Bauman s analyses of Western societies At the same time it points to Bauman s repeated insistence on the need for sociologists to take a moral stance in favour of the world s poor and

downtrodden as being his most valuable legacy The book will be of great interest to sociologists Its readability will be valued by undergraduates and postgraduates and it will attract a readership well beyond the discipline *Social Theory in Contemporary Asia* Ann Brooks,2010-07-14 Philosophical debates around reflexivity identity and intimacy have preoccupied Western social and cultural theorists since the 1990s and this book examines them in relation to the Chinese diasporic cultures in Asia The debates are set within the context of globalization and its impact on cultural gendered and ethnic identities in late modernity *Crafting Qualitative Research* Pushkala Prasad,2017-06-27 This book provides an overview of qualitative research models and their applications in organization and management studies Focusing on the philosophical underpinnings and practical implications of diverse qualitative methods this comprehensive text offers a guided tour of the options available to qualitative researchers highlighting aspects of research design execution and analysis in each tradition In clear readable prose the author offers insight into the ambiguities tensions and interconnections of diverse qualitative research traditions without resorting to oversimplification The book s four main sections include examples and applications specifically designed for the field of management Each chapter is devoted to a specific methodology describing techniques and applications as well as current controversies and emerging issues Summary boxes and practical examples will help the reader to navigate this terrain and generate research that is both relevant and of high scholarly quality With its detailed and easy to understand coverage this will be the text of choice for students working with qualitative methods in organization studies consumer research public administration information systems and media and communication studies Instructors teaching qualitative approaches in a research methods course and researchers wanting to acquaint themselves with non positivist traditions will also find this a useful resource *Demography in the Age of the Postmodern* Nancy E. Riley,James McCarthy,2003-07-24 Demography has developed into a remarkably coherent field and now stands as a firmly established discipline with strong ties to policy making agencies However in recent years there has been increasing recognition within demography of the limits of existing theories and methods particularly its absence of a strong critical tradition and its isolation from recent theoretical developments in other social sciences In this study Nancy Riley and James McCarthy use the lens of postmodernism to structure a critical analysis of the field of demography Paying particular attention to the fundamental epistemologies and methodologies that currently underlie the field they explore how postmodern perspectives might serve to energize the field and how demography could be enhanced by the introduction of insights from other social sciences Drawing on examples of new kinds of research in demography and related fields this is an important new book that seeks to reinvigorate the field of demography
