**Re-engineering the Enigma Cipher** Max Samuel Stoler, 2008

The design of this thesis is to re engineer the Enigma to make it a viable secure cipher for use on current computers The goal is to create a cipher based on an antiquated mechanical cryptography device the Enigma Machine in software and improve upon it The basic principle that is being expounded upon here is that while the Enigma security was originally very dependent on security through obscurity this needs to be secure on its own Also this must be a viable solution for the encryption of data based on modern standards The Enigma Phoenix the name for this new cipher will use Galois functions and other modern improvements to add an extra level of security to it and to make it the viable solution that is desired

*Women and Men of the Engineering Path* Clifford Adelman, 1998 This monograph provides college academic administrators institutional researchers professional and learned societies and academic advisors with information to improve understanding of the paths students take through engineering programs in higher education The evidence used in this study comes principally from the 11 year college transcript history 1982 1993 of the High School 2 migrants who crossed the threshold of the engineering path began to major in engineering but switched to other fields or left college altogether 3 completers some of whom continued on to graduate school by age 30 and 4 two year only students whose college experience was confined principally to engineering tech programs in community colleges Findings are presented in seven parts 1 Engineering Paths as Established by Students 2 The Content of Their Curriculum 3 Engineering and Science Confusing Signs along the Path 4 Antecedents of the Engineering Path 5 Choosing the Engineering Path 6 Learning Engineering Migration and Traffic and 7 Experiencing Engineering Classroom Environments Credit Loads and Grades A concluding section presents suggestions for changing the image of engineering among high school students and potential college majors particularly women Suggestions are also provided to other disciplines for undertaking similar tracking studies particularly in fields where men have been a distinct minority Contains 131 references and an appendix AA
