fiction he offers us a revelatory look at the firmament through his own telescope fitted with an anthropological lens. Throughout his explorations Grossinger continually reflects on the deeper meaning of our changing concepts about the universe and creation offering insight into how each new discovery causes us to redefine the values, moralities and aesthetics by which we live. He also calls into question the self-aggrandizing notion that humanity can and will conquer all and injects our strident confidence in science with a healthy dose of humility and wonder.
