Because of the COVID 19 pandemic millions of families worldwide have been thrust into schooling remotely at home Some parents look forward to sending their kids back to school but others have found they prefer schooling at home They've noticed things like My child has learned more at home with me in the last 2 months than in the past 2 years at school Or I kind of like spending so much time with my kids and learning alongside them Many parents are considering continuing homeschooling beyond the pandemic and this book is here to help them make an informed decision about their children's education Homeschooling is not about trying to reproduce a school environment at home It's not hours and hours sitting at a desk with a parent or in front of an online class Homeschooling is about creating an environment outside of the school structure that fosters a love of learning creativity family closeness and flexibility There is no one size that fits all in homeschooling every family is different and approaches homeschooling and parenting in their own unique way In this book 24 seasoned homeschooling families share their experiences The authors include both religious and secular homeschooling parents from all walks of life They represent a variety of homeschooling styles from self directed learning unschooling to more formal approaches abilities and disabilities marital statuses educational achievements job statuses races and socioeconomic levels The authors have children of all ages from babies preschoolers and kindergarteners to students in elementary school middle school or high school And some have children who are now adults They discuss what they love about homeschooling and also the challenges they've overcome We hope that this book will inspire and encourage those who are considering homeschooling as well as those who are already on their homeschooling journey And we hope it will expand your ideas about the concept of education and what's possible for yourselves and your children **The Home Education Handbook** Gill Hines, Dr. Alison Baverstock, 2019-06-11 Home educators want to provide a high quality learning experience for their children and this handbook is an excellent resource for making this aspiration a reality Dr Adam Boddison Chief Executive of National Association of Special Educational Needs If you are thinking of home educating your child your initial surprise may be at how easy it is to turn intention into reality Once you have deregistered your child you are largely left to get on with delivering education from home as you see best This book is full of practical guidance for parents based on the authors long experience of working with children and young people their parents teachers and schools It will help you plan what is taught as well as when and how The authors not only consider how to benefit from the opportunities home education provides but also suggest creative ways to fill the potential gaps that might arise from not being part of the traditional school system The Home Education Handbook covers everything from the socialisation of home educated children to advice on supporting the motivation and resilience of all involved This is a book that every parent who is considering home education or flexi schooling or is simply keen to ensure that their child gets the best education possible needs to read *Real-Life Homeschooling* Rhonda Barfield, 2002-05-18 The book that shows homeschooling in action What does it really mean when
