**Social Work in Higher Education** Karen Lyons, 2019-01-22 First published in 1999 in the light of recent moves towards deprofessionalisation and instrumentalism Karen Lyons has conducted extensive research into the challenges facing social work training as a higher education discipline Here these challenges are located in a discussion of wider changes in both higher education and the personal social services and are also linked to debates about professional education and the nature of knowledge The analysis is based on original data and includes reference to pedagogical and cultural factors and to internal and external policies which might make social work viable or vulnerable in the higher education context This multi disciplinary perspective reflects a characteristic of social work study itself a quality which might be seen as either problematic or as a strength The book concludes that while the future scale and form of the social work subject area lie partly outside the control of social work educators they have a key role to play in the development of the discipline This includes the promotion of research which should underpin the creation of knowledge and inform professional practice in the changing field of personal social services

approaches to child welfare can be used to support families experiencing behavioural problems with children or undergoing difficulties in raising them Specific practice examples developed in Britain Canada and Sweden provide an international dimension to this book Comparing and contrasting developments within these countries reveal that there are both similarities in the methods adopted and difference in the ways in which these are applied Common themes which appear across the stories that are presented include the importance of ensuring cultural specificity to respond to identity issues and local traditions the need to adhere to legislation that is country specific the importance of dealing with some child welfare issues on an international basis e g child abductions and the importance of giving children the space within which to articulate their own voice Additionally the book reveals how working with families from a community perspective which is centered in acknowledging children s rights and parental rights may challenge professionals in ways that they find uncomfortable Nevertheless the book concludes that practice can more effectively serve children s interests if parents and workers work in partnership with each other *Journal of Education for Social Work* ,2007
