Educating Adolescent Girls E. M. Chandler, 2022-12-29 Girls are worse than boys these days was a common complaint from teachers in the 1970s Whether true or not this viewpoint was pervasive yet little guidance had been given to the student teachers to help them tackle the problems that girls presented Originally published in 1980 the main purpose of this work was to provide a soundly based textbook on the education of adolescent girls which by taking into account the changing role of women in our society at the time would be of immediate use to all practitioners and students of education Research findings and material drawn from recent work by teachers in schools have been collated along with theoretical approaches selected for their relevance to teaching in a manner which demonstrates their practical implications The difficulties that teachers found in coping with the normal as well as the abnormal behaviour of girls is examined The importance of education for girls is looked at in the context of their future roles as members of the work force and as mothers of the next generation Reports and complaints about the inadequacies of the education system in preparing girls for their future life were rife In dealing with a topic which was causing such concern the author set out to fill a noticeable gap in the literature of Education at the time The book was designed for use by student teachers lecturers probationary teachers and their supervisors but social workers educational psychologists and others who deal with adolescents would also find it useful For students its value rested in the practical orientation of its information which gave it the dual function of handbook and academic textbook For practising teachers it gave advice encouragement and support

Not a Stage! Mark Dennis Vagle, 2012 Not a Stage is written for teachers students and scholars interested in the academic social and emotional needs of young adolescents It is unique because it actively resists basing the practice research and theory of young adolescent education on developmentalism and the developmental stage of young adolescence The purpose of this book is to begin to reorient the discourse on young adolescent growth and change and in turn reconceptualize the education of young adolescents The book infuses a contingent recursive conception of adolescent growth and change into the discourse around young adolescence by making three pleas to those interested in the schooling of young adolescents to move away from a developmentally responsive vision to a contingently and recursively relational vision to move from characterizing young

adolescence to particularizing young adolescents and to move from a sameness curriculum to a difference curriculum
