Democratic Education Amy Gutmann, 1999-03-29 A groundbreaking classic that lays out and defends a democratic theory of education Who should have the authority to shape the education of citizens in a democracy This is the central question posed by Amy Gutmann in the first book length study of the democratic theory of education The author tackles a wide range of issues from the democratic case against book banning to the role of teachers unions in education as well as the vexed questions of public support for private schools and affirmative action in college admissions *EBOOK: Education and the Struggle for Democracy* Wilfred Carr, Anthony Hartnett, 1996-03-16 During the past decade there has been a series of radical changes to the educational system of England and Wales This book argues that any serious study of these changes has to engage with complex questions about the role of education in a modern liberal democracy Were these educational changes informed by the needs and aspirations of a democratic society To what extent will they promote democratic values and ideals These questions can only be adequately addressed by making explicit the political ideas and the underlying philosophical principles that have together shaped the English educational system To this end the book provides a selective history of English education which exposes the connections between decisive periods of educational change and the intellectual and political climate in which it occurred It also connects the educational policies of the 1980s and 90s to the political ideas of the New Right in order to show how they are part of a broader political strategy aimed at reversing the democratic advances achieved through the intellectual and political struggles of the nineteenth and twentieth centuries The book proposes that a democratic educational vision can only effectively be advanced by renewing the struggle for democracy the historical struggle to create forms of education which will empower all citizens to participate in an open pluralistic and democratic society Democratic Education Amy Gutmann, 1999-01-01 Who should have the authority to shape the education of citizens in a democracy This is the central question posed by Amy Gutmann in the first book length study of the democratic theory of education The author tackles a wide range of issues from the democratic case against book banning to the role of teachers unions in education as well as the vexed questions of public support for private schools and affirmative action in college admissions Popular Education and Democratic Thought in America Rush Welter, 1962 **Democratic Education** Amy Gutmann, 1999 Who should have the authority to shape the education of citizens in a democracy This is the central question

Democracy and Education John Dewey, 1916 *Renewal of Life by Transmission* The most notable distinction between living and inanimate things is that the former maintain themselves by renewal A stone when struck resists If its resistance is greater than the force of the blow struck it remains outwardly unchanged Otherwise it is shattered into smaller bits Never does the stone attempt to react in such a way that it may maintain itself against the blow much less so as to render the blow a contributing factor to its own continued action While the living thing may easily be crushed by superior force it none the less tries to turn the energies which act upon it into means of its own further existence If it cannot do so it does not just split into smaller pieces at least in the higher forms of life but loses its identity as a living thing As long as it endures it struggles to use surrounding energies in its own behalf It uses light air moisture and the material of soil To say that it uses them is to say that it turns them into means of its own conservation As long as it is growing the energy it expends in thus turning the environment to account is more than compensated for by the return it gets it grows Understanding the word control in this sense it may be said that a living being is one that subjugates and controls for its own continued activity the energies that would otherwise use it up Life is a self renewing process through action upon the environment

Ideology And Educational Reform David C. Paris, 2019-03-13 *Ideology and Educational Reform* traces the underlying ideological problems that make genuine educational reform difficult It describes three major themes in public education common school human capital and clientelism
