Education At A Distance From Issues To Practice:

Learner-Centered Theory and Practice in Distance Education Thomas M. Duffy, Jamie R. Kirkley, 2003-12-08 This book examines critical issues in the design of theoretically based and pedagogically sound distance education programs It integrates theory and pedagogy with practical issues related to practitioners administrators evaluators and policy analysts

Theory and Practice of Distance Education Borje Holmberg, 2005-07-25 Distance education is practised in all parts of the world and in recent years its scope has developed enormously and rapidly It has become an intrinsic part of many national educational systems and an academic discipline in its own right Research into the area has produced a body of theory which is now being used to improve its practice This new edition of Theory and Practice of Distance Education has been thoroughly updated both by describing how practice has changed and by examining recent research in the field Like the first edition this book provides a comprehensive survey of distance education looking at it globally and discussing the different lines of thought and models used It describes the place of distance education in educational thinking its various theories principles and techniques of presentation its organization and its administration

Teaching and Learning at a Distance Michael Simonson, Sharon Smaldino, Susan M. Zvacek, 2014-10-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to distinguish between appropriate uses of distance education In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book This definition of distance education has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book was the importance of research to the development of the contents of the book The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a distance is derived from Richard Clark s famous quote published in the Review of Educational Research that states that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors did not make the claim that education delivered at a distance was inherently better than other ways people learn Distance delivered instruction is not a magical approach that makes learners achieve more The fourth theme of the book is equivalency theory Here we presented the concept that instruction should be provided to learners that is equivalent rather than identical to

what might be delivered in a traditional environment Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face to face classroom The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive that it should cover as much of the various ways instruction is made available to distant learners as is possible It should be a single source of information about the field

Education at a Distance D. Randy Garrison, Doug Shale, 1990-01-01 Going beyond the visual treatment of independent study through correspondence and a description of technology the theme of this book is independence and interaction in delivering education at a distance or improving this instruction

Real-Life Distance Education Anthony A. Pina, Al. P. Mizell, 2014-02-01 Real Life Distance Education Case Studies in Practice documents and discusses the experiences of those who have implemented distance learning as a solution to real life problems and provides guidance to assist readers in their understanding and analysis of distance learning This approach allows readers to develop analytic and problem solving skills The variety of different situations within the individual case studies allows readers to apply their knowledge to new and unique situations and to explore solutions to complex issues The book is useful as a primary or supplementary text in programs of educational technology instructional design learning sciences human resource development curriculum instruction media technology or higher education

Teaching and Learning at a Distance Michael Simonson, Susan Zvacek, 2024-01-01 Teaching and Learning at a Distance is written for introductory distance education courses for preservice or in service teachers and for training programs that discuss teaching distant learners or managing distance education systems This text provides readers with the basic information needed to be knowledgeable distance educators and leaders of distance education programs The teacher or trainer who uses this book will be able to design courses evaluate programs and identify issues and trends affecting the field In this text we take the following themes The first theme is the definition of distance education Before we started writing the first edition of Teaching and Learning at a Distance we carefully reviewed the literature to determine the definition that would be at the foundation of our writing This definition is based on the work of Desmond Keegan but is unique to this book and has been adopted by the Association for Educational Communications and Technology and by the Encyclopedia Britannica The second theme of the book is the importance of research to the development of effective courses and programs offered at a distance The best practices presented in Teaching and Learning at a Distance are validated by scientific evidence Certainly there are rules of thumb but we have always attempted to only include recommendations that can be supported by research The third theme of Teaching and Learning at a Distance is derived from Richard Clark s famous quote published in the Review of Educational Research asserting that media are mere vehicles that do not directly influence achievement Clark s controversial work is discussed in the book but is also fundamental to the book s advocacy for distance education in other words we authors do not make the claim that education delivered at a distance is inherently better than other ways people learn Distance delivered instruction

is not a magical approach that makes learners achieve more. Equivalency theory is the fourth theme of the book. Here we present the concept that instruction should be provided to learners that is equivalent rather than identical to what might be delivered in a traditional environment. Equivalency theory helps the instructional designer approach the development of instruction for each learner without attempting to duplicate what happens in a face-to-face classroom. The final theme for Teaching and Learning at a Distance is the idea that the book should be comprehensive; that it should cover as much of the various ways instruction is made available to distant learners as is possible. It can serve as a stand-alone source of information.

Handbook of Distance Education Michael Grahame Moore, 2013-05-07. The third edition of this award-winning Handbook continues the mission of its predecessors to provide a comprehensive compendium of research in all aspects of distance education, arguably the most significant development in education over the past three decades. While the book deals with education that uses technology, the focus is on teaching and learning and how its management can be facilitated through technology. Key features include Comprehensive coverage that includes all aspects of distance education including design, instruction, management, policy, and a section on different audiences. Chapter authors frame their topic in terms of empirical research, past and present, and discuss the nature of current practice in terms of that research. Future research needs are discussed in relation to both confirmed practice and recent changes in the field. Section one provides a unique review of the theories that support distance education pedagogy. Section six includes a unique review of distance education as a component of global culture. This book will be of interest to anyone engaged in distance education at any level. It is also appropriate for corporate and government trainers and for administrators and policy makers in all these environments. Recipient of the 2013 IAP Distance Education Book Award.

Online Distance Education Olaf Zawacki-Richter, Terry Anderson, 2014-06-01. Online Distance Education: Towards a Research Agenda offers a systematic overview of the major issues, trends, and areas of priority in online distance education research. In each chapter, an international expert or team of experts provides an overview of one timely issue in online distance education, summarizing major research on the topic, discussing theoretical insights that guide the research, posing questions and directions for future research, and discussing the implications for distance education practice as a whole. Intended as a primary reference and guide for distance educators, researchers, and policymakers, Online Distance Education addresses aspects of distance education practice that have often been marginalized, including issues of cost and economics, concerns surrounding social justice, cultural bias, the need for faculty professional development, and the management and growth of learner communities. At once soundly empirical and thoughtfully reflective, yet also forward-looking and open to new approaches to online and distance teaching, this text is a solid resource for researchers in a rapidly expanding discipline.
