**The Claims of Experience** Nolan Bennett, 2019-08-21 Why have so many figures throughout American history proclaimed their life stories when confronted by great political problems The Claims of Experience provides a new theory for what makes autobiography political throughout the history of the United States and today Across five chapters Nolan Bennett examines the democratic challenges that encouraged a diverse cast of figures to bear their stories Benjamin Franklin amid the revolutionary era Frederick Douglass in the antebellum and abolitionist movements Henry Adams in the Gilded Age and its anxieties of industrial change Emma Goldman among the first Red Scare and state opposition to radical speech and Whittaker Chambers amid the second Red Scare that initiated the anticommunist turn of modern conservatism These historical figures made what Bennett calls a claim of experience By proclaiming their life stories these authors took back authority over their experiences from prevailing political powers and called to new community among their audiences Their claims sought to restore to

readers the power to remake and make meaning of their own lives Whereas political theorists and activists have often seen autobiography to be too individualist or a mere documentary source of evidence this theory reveals the democratic power that life narratives have offered those on the margins and in the mainstream If they are successful claims of experience summon new popular authority to surpass what their authors see as the injustices of prevailing American institutions and identity Bennett shows through historical study and theorization how this renewed appreciation for the politics of life writing elevates these authors distinct democratic visions while drawing common themes across them This book offers both a method for understanding the politics of life narrative and a call to anticipate claims of experience as they appear today *A Library of Literary Criticism* Dorothy Nyren Curley,1960 *North Over South* Susan-Mary Grant,2000 This text argues that the Civil War truly formed the American nation and that the antebellum period was the crucial phase of American national construction Grant focuses on a Northern nationalism based on an opposition to things Southern and links national construction with European nationalism Routledge Library Editions: Adult Education Various Authors,2021-07-14 Against a background of profound worldwide social and economic change the concept of lifelong learning has come increasingly into the public eye As educators and policy makers rethink the meaning of education the purpose of schooling and the place of learning in our everyday lives educational institutions are opening up to those traditionally deprived of the opportunity The books in this set originally published between 1979 and 1992 including global case studies reflect upon major issues confronting adult educators worldwide and discuss the role of adult education in social and community action examine the relationship between class and adult education look at the concept of culture and the transmission of cultural values in relations to adult education evaluate the role of adult education in reducing unemployment **Bulletin - Bureau of Education** United States.
