They asked macro analytic questions What are the conditions in which educational policy is successfully formulated How is this educational policy implemented What are the consequences of this policy From the start West Germany demanded a complete dismantling of the educational system in the former German Democratic Republic West German political leaders insisted as a condition of unification that all important agreements concerning education made by the GDR states be accepted by the new states The authors research shows that even before the unification East Germans had already opted for a system consistent with West German education law However the West Germans disregarded these changes and imposed their own version of reform on East Germany The study reveals that in this period of confusion the East Germans did not fully analyze the implications of the imposed conditions which now have unforeseen negative consequences The German situation is of great interest to all educators particularly students of educational policy making as well as researchers in political science economics and sociology *Teacher Education in Industrialized Nations* Ivan Z. Holowinsky, Nobuo K.

Shimahara, 2014-04-08 The original essays in this volume examine reform related issues in teacher education in Great Britain Canada Japan Ukraine United States and Western Europe A distinguished group of educators reviews the social context of the teacher the economics and value of teaching the pace of change government policy and teacher control of the profession and the evolving role of the teacher and education system in the face of political and social upheaval **Women,**

made to create a cross cultural framework This work offers such a framework Eight chapters written by educators in each country s educational system cover the following nations China Great Britain Hungary Japan Iran Pakistan United States and Zimbabwe Historical discussions in each chapter provide a context for current practice An index and illustrations are also included

Quality

Education for All Dean H. Nielson, William K. Cummings, 2014-04-08 Modern education conceived in the late 18th century and expanded in the early 19th century to promote enlightenment and social equality may finally be nearing its institutional limit Over the past decade following nearly a century of steady gains there has been little further advancement in modern education The modern system has proved effective in serving the interests of the established core of contemporary society but ineffective in reaching for the periphery The contributors to this volume offer various corrective approaches to correct this state of affairs

Third World Education Anthony R. Welch, 2002-05-03 This book debunks the argument that quality in education can only be achieved by limiting or trading off equality The quality of schooling is a major issue for Third World nations across the globe However there is no single measure which is universally accepted Whether it is as some economists might argue an issue of the number of desks per classroom or one of national sovereignty is widely disputed Defining equality in education becomes increasingly difficult in an era of globalization in which there exists a wide gap between rich and poor both within and between nations In the context of an international move towards New Right politics and neo liberal economic ideologies both the quality and equality of education are imperiled This book argues that any worthy definition of quality education must include the interests and participation of the underprivileged
