Education That Empowers:

An Education that Empowers Jean Rudduck, 1995 This book brings together five lectures given by eminent educationalists in memory of the work of Lawrence Stenhouse an influential figure in the field of education during the 1970s and early 1980s The lectures focus on different themes in his work reviewing them in the light of recent policy changes The lectures review issues to do with the school curriculum teaching and learning teacher education and teacher research A strong theme across the papers is the authors concern with the political context of educational change Jean Rudduck has also published *Innovation and Change Dimensions of Discipline and Developing a Gender Policy in Secondary Schools* Education and Empowered Citizenship in Mali Jaimie Bleck, 2015-10-01 Explores the connections between access to education and political engagement in Mali Primary school enrollment has nearly tripled in Mali since 1991 when the country made its first transition to multiparty democracy Jaimie Bleck explores the effect of this expanded access to education by analyzing the relationship between parents and students respective experiences with schooling and their current participation in politics In a nation characterized both by the declining quality of public education and by a growing number of accredited private providers does education contribute substantially to the political knowledge and participation of its citizens Are all educational institutions public and private Islamic and secular equally capable of shaping democratic citizens Education and Empowered Citizenship in Mali is informed by Bleck s original survey of one thousand citizens which she conducted in Mali before the 2012 coup d tat along with exit polls and interviews with parents students and educators Her results demonstrate conclusively that education of any type plays an important role in empowering citizens as democratic agents Simply put students know more about politics than peers who have not attended school Education also appears to bolster participation of parents Bleck finds that parents who send their children to public school are more likely to engage in electoral politics than other Malian citizens Furthermore Bleck demonstrates that increasing levels of education are associated with increases in more engaged forms of political participation including campaigning willingness to run for office and contacting government officials

AI IN EDUCATION: EMPOWERING LEARNING AND TEACHING Prof. Sanjay Agal, 2023-08-21

With the assistance of artificial intelligence which has the ability to radically revolutionize the educational system the processes of teaching and learning may be made more successful This may be the case for both teaching and learning The ever expanding capabilities of AI make it feasible for it to develop personalised learning experiences to streamline administrative operations to improve student assessment and to give teachers with crucial insights In the field of education the following is a list of significant areas in which artificial intelligence is making learning and teaching more possible Individualized Instruction The ability of artificial intelligence to analyze vast amounts of student data such as performance preferences and learning styles enables it to give students with the opportunity to participate in individualized learning The material covered in a class as well as its pace and level of difficulty may be adjusted by intelligent tutoring systems to meet

the needs of each specific learner This leads to improved levels of involvement and understanding on the part of the students

Platforms for Adaptive Learning AI powered adaptive learning platforms utilize algorithms that continually assess a student s progress and adjust the learning material accordingly The name given to these kinds of systems is adaptive learning platforms These platforms either identify the specific areas in which students need further practice or present them with additional resources to assist them with their study Because it caters to the specific requirements of each individual student adaptive learning is able to maximize the educational advantages that it offers to their fullest potential

Intelligent Virtual Assistants Chatbots and other types of virtual assistants that are driven by artificial intelligence AI are available to provide students with rapid help They are able to provide students with answers explanations and support as well as send them in the direction of resources that are relevant to the situation Intelligent virtual assistants make it easier to obtain more information and also promote individual study

1 P a g e Automated marking and commenting systems Artificial intelligence has the ability to automate the grading process for objective tests such as multiple choice questions This would free up the time of educators so that they could focus on more involved tasks

Techniques such as Natural Language Processing NLP make it feasible for artificial intelligence to evaluate subjective forms of assessment such as essays and provide students detailed feedback The employment of artificial intelligence AI technology which may assist educators in producing content of a higher level may be of assistance in the production of intelligent content They are able to generate interactive materials develop tests and pick resources in a manner that is congruent with certain educational objectives

Tools for producing content that are powered by artificial intelligence boost efficiency and help teachers generate interesting instructional materials

Analytics Predictive Artificial intelligence is able to spot patterns and produce forecasts by analyzing huge volumes of data which allows it to generate predictions about the performance of pupils as well as their behavior and the repercussions of their activities Educators have the ability to make use of these insights in order to intervene early and provide timely assistance to students who are having difficulty so improving both retention rates and academic attainment

The terms **Virtual Reality VR** and **Augmented Reality AR** refer to the following Virtual reality VR and augmented reality AR may deliver learning experiences that are both immersive and engaging if they are combined with AI technology Students have the chance to expand both their theoretical understanding and their ability to put that understanding into practice in a range of domains by exploring virtual environments carrying out experiments and taking part in simulations

Making decisions based on the data provided Artificial intelligence assists many stakeholders in the education system in making decisions based on data The analytics made available by AI could be of use to administrators at educational institutions in recognizing trends enhancing resource allocation and improving operational efficiency

Dashboards that are powered by AI provide real time information on the progress that students are making allowing instructors to adjust their instructional strategies in accordance with the needs of their pupils
