Bailey,2004-06-02 First published in 1959 The scope of this four volume work makes it valuable as a work of reference connecting one period with another an placing each author clearly in the setting of his time This is the fourth volume and includes the Nineteenth Century and after 1789 1939 *Social Paralysis and Social Change* Neil J. Smelser,1991-09-03 Neil

Smelser's *Social Paralysis and Social Change* is one of the most comprehensive histories of mass education ever written. It tells the story of how working class education in nineteenth century Britain, often paralyzed by class, religious and economic conflict, struggled forward toward change. This book is ambitious in scope. It is both a detailed history of educational development and a theoretical study of social change at once: a case study of Britain and a comparative study of variations within Britain. Smelser simultaneously meets the scholarly standards of historians and critically addresses accepted theories of educational change, progress, conflict and functional theories. He also sheds new light on the process of secularization, the relations between industrialization and education, structural differentiation and the role of the state in social change. This work marks a return for the author to the same historical arena, Victorian Britain, that inspired his classic work *Social Change in the Industrial Revolution* thirty five years ago. Smelser's research has again been exhaustive. He has achieved a remarkable synthesis of the huge body of available materials, both primary and secondary. Smelser's latest book will be most controversial in its treatment of class as a primordial social grouping, beyond its economic significance. Indeed, his demonstration that class, ethnic and religious groupings were decisive in determining the course of British working class education has broad ranging implications. These groupings remain at the heart of educational conflict, debate and change in most societies, including our own, and prompt us to pose again and again the chronic question: who controls the educational terrain?

Studies in the Growth of Nineteenth Century Government Gillian Sutherland, 2013-04-15 The main theme of this book is the complex relationship between government servants and the world around them, and this is explored in a number of ways. The essays include studies of the people who played an important part in the development of 19th century government: there is a chapter on the transmission of Benthamite ideas, an account of John Stuart Mill and his views on utilitarianism and bureaucracy, and of the work of Charles Trevelyan on the Northcote-Trevelyan Report. The Treasury, the Colonial and Foreign Offices, the Labour Department, the Board of Trade are also examined in relation to government growth in the period. Writers Directory NA

NA, 2016-03-05 *Evangelicals and Education* Khim Harris, 2007-09-01 This is the first history of English public schools founded by Evangelicals in the nineteenth century. Five existing public schools can be traced back to this period: Cheltenham College, Dean Close School, Monkton Combe School, Trent College and St Lawrence's College. Some of these schools were set up in direct competition with new Anglo-Catholic schools, while others drew their inspiration from, and to a greater or lesser extent were modelled on, their rivals. Harris documents for the first time the rise of Evangelical societies such as the influential Church Association and the little-known Clerical and Lay Associations. An extensive bibliography and useful biographical survey of influential Evangelicals of the period completes this groundbreaking study.

The Lincoln Library of Essential Information, 1924 **Philosophers as Educational Reformers (International Library of the Philosophy of Education Volume 10)** Peter Gordon, John White, 2010-02-25 This volume assesses how far the ideas and achievements of the 19th century British Idealist philosophical reformers are still important for us today when considering fundamental

questions about the structure and objectives of the education system in England and Wales Part 1 examines those ideas of the Idealists especially T H Green which had most bearing on the educational reforms carried out between 1870 and the 1920s and traces their connection with the philosophy and educational theory of Hegel and other post Kantians Part 2 is an historical survey concentrating on the innovations in the organization and contents of education in England and Wales brought about by the administrators and educationists educated in philosophical idealism Part 3 considers what relevance the philosophical and practical ideas of this interconnected group of reformers have to education today *The Literature of Education* W. Kenneth Richmond, 2019-01-15 Original blurb The volume of writing on educational topics has increased so prodigiously in recent years that the student is likely to lose himself in a sea of print This may lead him to opt for the first book that comes to hand or waste time rifling through half a dozen when a thorough grasp of one key text is all that is needed Reading lists commonly look impressive not to say daunting In fact the multifarious titles conceal an enormous amount of duplication an endless raking over of other people s research findings It is a safe bet writes W Kenneth Richmond that less than 5 percent of the contents of any new book on education will be in any way original This critical bibliography originally published in 1972 is concerned with the noteworthy books and major official reports that had appeared in the English language during the twenty five years prior to publication In his introduction and in the commentaries prefacing each section the author explains the background to the genuinely new departures of the period and describes successive changes in the climate of educational opinion
