Changing Educational Assessment Patricia Broadfoot,Roger Murphy,Harry Torrance,2012 Assessment is a key area of interest and debate in education Its increased use by governments as a powerful means of influencing educational practice are now features of the educational scene worldwide This volume was the first major international review of such developments and it explores the impact of assessment on all areas of education from teaching skills to policy making The contributors take a global perspective to spotlight the common problems facing teachers and students policy makers and politicians through the world as they seek to reconcile issues of equity and national development educational imperatives and finite state resources The contributions discuss the changing role of assessment and public examinations and consider such specific issues as the development of a market economy in educational provision the difficulties of measuring standards in international studies and accreditation of absolute rather than relative competencies

Educational Assessment in Latin America Sue Swaffield,Sally M Thomas,2019-07-23 This collection presents educational assessment research from Latin America adding to a relatively small but growing body of research considering educational assessment and evaluation issues in this large region The predominance of Chile reflects its early highly centralized education system and the fact that it adopted national testing before other Latin American countries It was also an early participant in international assessment programmes Other countries have followed the trend of implementing national testing and to a lesser extent participating in international surveys The complementary development of technical expertise in quantitative research methods has enabled extensive analysis of the large data sets generated by these testing and assessment programmes Taken together the evidence reported provides a means not only of reviewing educational quality issues in Latin America but also of facilitating comparisons that allow the context specificity of equivalent research conducted in western developed countries to be considered The chapters in this book were originally published as a special issue of Assessment in Education Principles Policy and Practice

Educational Assessment Christine Harrison,Constant Leung,David Pepper,2023-10-19 This book explores and builds on the extraordinary work of Professor Paul Black across assessment and pedagogy across the curriculum including STEM humanities and social science subjects This book explores the influence that Black has had within educational settings focusing on interpretations of the work and scholarship he has achieved across a range of settings and

on the ways scholars who have worked with him or been influenced by his ideas have developed their research and teaching. The contributions are presented under three thematic sections each of which reflects a set of shared educational concerns and values drawing on the natural and social sciences and developments in public policy. These concerns and values with their emphasis on teacher assessment provide a basis for a strategic informed and coherent response to challenges in education such as the cancellation of public examinations in the face of the Covid 19 pandemic.

Rebuilding Public Confidence in Educational Assessment Mary Richardson, 2022-05-23 Educational assessment is important. But in the twenty first century it is easy to feel that schooling and other phases of education are shaped entirely by certain assessments and that assessment is only about exam results. The idea that test grades can accurately describe the aims and outcomes of education is unfair and reductive. Yet it is a pervasive and persuasive discourse. This book is about such discourses, the stories we tell each other and how they impact public trust and confidence in educational assessment. It explains the roots and nature of assessment discourses and proposes a restructuring of the debates in order to rebuild public confidence. It aims to challenge dominant assessment discourses and demands a more nuanced informed debate about what happens in and beyond schools and how this influences public thinking. Questioning the status quo needs buy in from policymakers, teachers, parents and students and from the broader public from journalists, you, me, our friends and our children. Using examples from international settings to explore the nature of trust in assessment discourses, *Rebuilding Public Confidence in Educational Assessment* shows how these discourses can be reframed so that all aspects of the assessment system, policymaking, school planning, home practice with students can be undertaken with confidence.

Theoretical Issues of Using Simulations and Games in Educational Assessment Harold F. O'Neil, Eva L. Baker, Ray S. Perez, Stephen E. Watson, 2021-08-26 Presenting original studies and rich conceptual analyses, this volume reports on theoretical issues involved in the use of simulations and games in educational assessment. Chapters consider how technologies can be used to effectively assess, modify and enhance learning and assessment in education and training. By highlighting theoretical issues arising from the use of games and simulations as assessment tools for selection and classification, training and evaluation across educational and workplace contexts, the volume offers both broad conceptual views on assessment as well as rich descriptions of various context specific applications. Through a focus that includes both quantitative and qualitative approaches, policy implications, meta analysis and constructs, the volume highlights commonalities and divergence in theoretical research being conducted in relation to K-12, post secondary and military education and assessment. In doing so, the collection enhances understanding of how games and simulations can intersect with the science of learning to improve educational outcomes. Given its rigorous and multidisciplinary approach, this book will prove an indispensable resource for researchers and scholars in the fields of educational assessment and evaluation, educational technology, military psychology and educational psychology.
