Ramos-Kittrell, 2019-12-12 winner of the 2021 Ellen Koskoff Edited Volume Prize Decentering the Nation Music Mexicanidad and Globalization considers how neoliberal capitalism has upset the symbolic economy of Mexican cultural discourse and how this phenomenon touches on a broader crisis of representation affecting the nation state in globalization This book argues that while mexicanidad emerged in the early twentieth century as a cultural trope about national origins culture and history it was nonetheless a trope steeped in otherization and used by nation states Mexico and the United States to legitimize narratives of cultural and socioeconomic development stemming out of nationalist political projects that are now under strain Using music as a phenomenological platform of inquiry contributors to this book focus on a critique of mexicanidad in terms of the cultural processes through which people contest ideas about race gender and sexuality reframe ideas of memory history and belonging and negotiate the experiences of dislocation that affect them The volume urges readers to find points of resonance in its chapters and thus interrogate the asymmetrical ways in which power traverses their own historical experience In light of the crisis in representation that currently affects the nation state as a political unit in globalization such resonance is critical to make culture an arena of social collusion where alliances can restore the fiber of civil society and contest the pressures that have made disenfranchisement one of the most alarming features characterizing the complex relationships between the state and the neoliberal corporate system that seeks to regulate it Scholars of history international relations cultural anthropology Latin American studies queer and gender studies music and cultural studies will find this book particularly useful *Where Is Home? (Donde Esta Mi Casa?)* Gunter Pauli, 2007-03 Where is Home is a beautifully illustrated bilingual Spanish English children's book that uses Gunter Pauli's ZERI Education model to teach children science The book includes a teachers and parents guide and hands on activities that help children apply what they

have learned Gunter Pauli's ZERI Education model proposes that children adolescents and young adults learn science in a way that gives them a more profound academic understanding at the same time that it helps develop their emotional intelligence eco literacy and artistic creative capacities If children are to learn how to think design create and dream in systems then they must be exposed to systems thinking at an early age Critical concepts become part of the child's long term memory and the student gains an intuitive grasp of the big picture Then the learning of the specific tools concepts and principles involved become far more appealing When students start with a story that integrates ethics economics biology and mathematics they will be drawn to studying those disciplines later on Pauli's work in sustainable manufacturing and agricultural became the catalyst for a major educational reform in Colombia The strife and violence that exists in this country spawned an urgent desire on the part of college students to rebuild their society The professors and engineering students at University EAFIT in Medellin Colombia eagerly embraced an integrated educational approach including a compulsory course in biology for engineering majors As the concept spread to other universities the need to mold the earlier educational tracks in this new direction became apparent first in a High School in Manizales where ZERI's coffee and bamboo projects have taken off and then in elementary schools which asked for a version of this program adapted to their level comparable to the Garden School projects of the Center for Ecoliteracy
