El Salvador Post Conflict Reconstruction:

El Salvador John Rudolph Eriksson, Alcira Kreimer, Margaret Arnold, 2000-01-01 The Operations Evaluation Department OED is an independent unit within the World Bank assessing what works and what does not how a borrower plans to run and maintain a project and the lasting contribution of the Bank to a country's overall development The goals of evaluation are to learn from experience to provide an objective basis for assessing the results of the Bank's work and to provide accountability in the achievement of its objectives It also improves Bank work by identifying and disseminating the lessons learned from experience El Salvador John Rudolph Eriksson, Alcira Kreimer, Margaret Arnold, Banque internationale pour la

reconstruction et le développement. Operations Evaluation Department, 2000 **The World Bank's Experience with Post-conflict Reconstruction**, 1998-01-01 Clearing landmines rehabilitating and integrating of excombatants rebuilding the infrastructure coordinating aid sources these are just some of the issues confronting the Bank in post conflict reconstruction The explosion of civil conflicts in the post Cold War world has tested the World Bank's ability to address unprecedented devastation of human and social capital This study covers post conflict reconstruction in nine countries assessing relevant recent Bank experience It also presents case studies for ongoing and future operations which analyze 1 the Bank's main strengths or comparative advantages 2 its partnership with other donors international organizations and NGOs 3 its role in reconstruction strategy and damage and needs assessment 4 its role in rebuilding the economy and institutions of governance 5 its management of resources and processes 6 implications for monitoring and evaluation

Post-conflict Reconstruction Alcira Kreimer, 1998 *Explaining Post-Conflict Reconstruction* Desha Girod, 2015-02-02 The international community has donated nearly one trillion dollars during the last four decades to reconstruct post conflict countries Where did the money go This book argues that foreign aid only fosters reconstruction when post conflict leaders are desperate for income and thus depend on aid that comes with reconstruction strings attached El Salvador John Rudolph Eriksson, 2000 **Women, Gender Equality, and Post-Conflict Transformation** Joyce P. Kaufman, Kristen P. Williams, 2016-10-04 The end of formal hostilities in any given conflict provides an opportunity to transform society in order to secure a stable peace This book builds on the existing feminist international relations literature as well as lessons of past cases that reinforce the importance of including women in the post conflict transition process and are important to our general understanding of gender relations in the conflict and post conflict periods Post conflict transformation processes including disarmament demobilization and reintegration DDR programs transitional justice mechanisms reconciliation measures and legal and political reforms which emerge after the formal hostilities end demonstrate that war and peace impact and are impacted by women and men differently By drawing on a strong theoretical framework and a number of cases this volume provides important insight into questions pertaining to the end of conflict and the challenges inherent in the post conflict transition period that are relevant to students and practitioners alike **Rebuilding War-Torn States** Graciana del

Castillo,2008-09-25 Post conflict economic reconstruction is a critical part of the political economy of peacetime and one of the most important challenges in any peace building or state building strategy After wars end countries must negotiate a multi pronged transition to peace Violence must give way to public security lawlessness political exclusion and violation of human rights must give way to the rule of law and participatory government ethnic religious ideological or class caste confrontation must give way to national reconciliation and ravaged and mismanaged war economies must be reconstructed and transformed into functioning market economies that enable people to earn a decent living Yet how can these vitally important tasks each be successfully managed How should we go about rehabilitating basic services and physical and human infrastructure Which policies and institutions are necessary to reactivate the economy in the short run and ensure sustainable development in the long run What steps should countries take to bring about national reconciliation and the consolidation of peace In all of these cases unless the political objectives of peacetime prevail at all times peace will be ephemeral while policies that pursue purely economic objectives can have tragic consequences This book argues that any strategy for post conflict economic reconstruction must be based on five premises and examines specific post conflict reconstruction experiences to identify not only where these premises have been disregarded but also where policies have worked and the specific conditions that have influenced their success and failure

Post-Conflict Reconstruction

Neil Ferguson,2010-10-12 Violence and conflict are two of the greatest challenges the world will face in this millennium Indeed since the turn of the century it is estimated that approximately four million people have died as a result of armed conflict Ending these seemingly intractable conflicts is a priority for global stability However the signing of the peace accord or the ending of formal hostilities does not automatically bring a return to normality in these fractured societies In practice it is more likely that these fractured societies will face a period in the twilight between war and peace a time when the world turns its attention to new problems and seemingly more pressing matters leaving the country to struggle towards peace and a new social order The book s contributors deal with the challenges faced in creating the foundations for the development of a positive peace from a variety of multi disciplinary perspectives such as development studies politics psychoanalysis psychology sports studies and neuroscience This breadth of perspectives offers innovative insights into the grey space between war and peace which is home to millions of people across the globe and explores interventions which aim to create the conditions for positive post conflict reconstruction

Postconflict Development Gerd Junne,Willemijn Verkoren,2005 A comprehensive discussion of the specific development challenges faced in postconflict societies and a range of concrete successful approaches to confronting those challenges

Security and Post-Conflict Reconstruction

Robert Muggah,2008-11-04 This book provides a critical analysis of the changing discourse and practice of post conflict security promoting interventions since the Cold War such as disarmament demobilization and reintegration DDR and security sector reform SSR Although the international aid and security sectors exhibit an expanding appetite for peace support operations in

the 21st Century the effectiveness of such interventions are largely untested This book aims to fill this evidentiary gap and issues a challenge to conventional approaches to security promotion as currently conceived by military and peace keeping forces drawing on cutting edge statistical and qualitative findings from war torn areas including Afghanistan Timor Leste Sudan Uganda Colombia and Haiti By focusing on specific cases where the United Nations and others have sought to contain the presumed sources of post conflict violence and insecurity it lays out a new research agenda for measuring success or failure This book will be of much interest to students of peacebuilding peacekeeping conflict resolution conflict and development and security studies in general Walking the Tightrope Jäir van der Lijn,2006 The media generally tend to focus in particular on the failures of U N peacekeeping operations In Walking the Tightrope Jäir Van Der Lijn draws a different conclusion He argues once a peace agreement has been signed the efforts of the U N peacekeeping operations do contribute to durable peace By analyzing the U N peacekeeping operations in Cambodia Mozambique Rwanda and El Salvador in a structured focused comparison this book shows how U N operations do have a contribution to make

Investing in Peace James K. Boyce,2013-06-17 This book analyzes the provision of aid to countries that have undergone negotiated settlements to civil wars drawing on recent experiences in Bosnia Cambodia El Salvador and Guatemala It focuses on the potential for peace conditionality linking aid to steps to implement accords and consolidate the peace The book explores how aid can encourage domestic investment in peace related needs the reconciliation of long run peacebuilding objectives with short run humanitarian imperatives and the obstacles that donors priorities and procedures pose to effective aid for peace It concludes that investing in peace requires not only the reconstruction of war torn societies but also the reconstruction of aid itself **The Uncertain Transition from Stability to Peace** Robert D. Lamb,Kathryn Mixon,Sarah

Minot,2015-03-01 Most violent conflicts since the turn of this century were in countries that had experienced an earlier violent conflict How can we tell when a country is likely to remain stuck in a cycle of violence What factors suggest it might be ripe for stabilizing and peace building The authors studied four cases Chad is stuck in a cycle of violence while El Salvador Laos and Mozambique have had different results in their transitions from violence to stability to peace Conflicts without internal cohesion of combatants or pressure from foreign patrons to stop fighting are probably not ripe for stabilizing Where there are subnational or regional actors committed to violence post conflict peace building is not likely to succeed without enforcement capacity to contain violence or demonstrated commitments to increasing political inclusion and making material improvements in the lives of residents *Guide to Rebuilding Governance in Stability Operations* Derick W.

Brinkerhoff,Ronald W. Johnson,Richard Hill,2009 This guide is designed to further U S military understanding of the critical nation state building role that U S forces play during stability operations It focuses on the military s role in rebuilding and establishing a functional effective and legitimate nation state one that can assure security and stability for its citizens defend its borders deliver services effectively for its populace and is responsible and accountable to its citizens It provides a

comprehensive approach to planning and implementing a program to rebuild governance by U S peacekeeping forces during stability operations Recognizing that the extent of U S Government and military involvement is determined by the mandate the mission the level of resources and most importantly the host country context this guide provides options and trade offs for U S forces in executing these operations *Post-Disaster Reconstruction of the Built Environment* Dilanthi Amaratunga, Richard Haigh, 2011-06-13 Disasters threaten all parts of the world and they appear to be increasing in frequency scale and intensity Despite huge improvements in the emergency response permanent reconstruction is often uncoordinated inefficiently managed and slow to begin International agencies are geared to an efficient response in terms of humanitarian relief but they are not well versed in the requirements of long term reconstruction which is often constrained by lack of planning and poorly coordinated management The construction industry is typically engaged in a range of critical activities after a disaster including provision of temporary shelter in the immediate aftermath and restoration of permanent shelter and public infrastructure once the immediate humanitarian needs have been attended to Post Disaster Reconstruction of the Built Environment identifies the challenges that face the industry and highlights best practice to enable the construction industry to address those problems which make an effective response to these unexpected events difficult Written by an international team of experts this book will help researchers and advanced students of construction understand the problems faced by communities and the construction industry when faced with a natural or man made disaster and identify the planning and management processes required by the industry to mount an effective response Globalization, International Education Policy and Local Policy Formation Carolyn A. Brown, 2014-10-13 This edited volume focuses on how international education policy set by international policymakers and donors influences local education policy in developing countries The book s primary purpose is to give voice to scholars from developing countries and regions around the world by inviting them to explore how the international policy invariably linked to international aid influences education policy formation and implementation in their country or region and how this influence does or does not meet the local cultural social economic and political needs A relatively recent and small body of research and commentary supports a discourse that questions how well international education policy mandates such as Education For All serve the needs of developing countries The intent of this book is to advance this discourse by giving voice to local scholars who observe and study the donor process The book will be divided into two sections the first section will set the stage for the discussions in the second section by providing theoretical and historical context for international education policy As a framework for understanding the book adopts the position that international policy does not have either the ability or the intent to serve the widely diverse needs of development around the world International education policy has been formed historically by wealthy nations and agencies dominated by Western theoretical paradigms In recent years donor countries have made an effort to collaborate with developing countries in developing international education policy goals however this collaboration has been limited

Following establishment of the context of international education policy section II of the book provides a forum for scholars from around the world to openly discuss and critique the impact of international policy on education in their country or region

Social Funds, 2002-01-01 This study reviews the development effectiveness of social fund projects and considers the implications for their future support by the World Bank It finds that the performance of such projects has improved over time in many respects However although they have been highly effective in delivering small scale infrastructure they have been less successful in achieving consistent improvements in outcomes and welfare impacts The report recommends greater transparency and selectivity in the use of this policy instrument

The Drive to Partnership John R. Eriksson, 2001-01-01 Results based conceptual frameworks Stakeholder views and related findings Country context and measuring aid coordination quality

Information Infrastructure Alain Barbu, Rafael Dominguez, William H. Melody, 2001-01-01 This publication follows up on the 1993 review of the Bank's experience in telecommunications it assesses how their assistance from has influenced the development of information infrastructure in developing countries It finds that the recommendations from 1993 have generally been heeded with the adoption of a new private sector led agenda and increasing the share of IFC in total Bank Group funding commitments However the ability to play a global policy leadership role has been hampered by a benign neglect of the sector at both the strategic and country management level
