

Electra II

A surreal collage illustration. At the top, a biplane flies across a blue sky. Below it, a woman in a long white dress stands in a field. To her left, a white horse is partially visible. In the foreground, a green bust of a man's head sits on a dark base. Next to it, a woman with short brown hair, wearing a pink top, looks towards the viewer. To her right, a man in a suit and tie is depicted. The background features a landscape with a windmill, a small white house, and a larger building with a red roof. The overall style is reminiscent of mid-20th-century collage art.

Mitchell* Loren C. Steffy, 2019-10-18 Upon George Mitchell s death in 2013 The Economist proclaimed Few businesspeople have done as much to change the world as George Mitchell a billionaire Texas oilman who defied the stereotypical swagger so identified with that industry In George P Mitchell Fracking Sustainability and an Unorthodox Quest to Save the Planet award winning author Loren C Steffy offers the first definitive biography of Mitchell placing his life and legacy in a global context from the significance of his discoveries to the lingering controversies they inspired Mitchell will forever be known as the father of fracking but he didn t invent the drilling process he perfected it and made it profitable one of many varied ventures he pursued for years Long before his company ever fracked a well he pioneered sustainable development by creating The Woodlands near Houston one of the first and most successful master planned communities Its focus on environmental protection and livability redefined the American suburb This apparent contradiction between his energy interests and

environmental pursuits which his son Todd dubbed the Mitchell Paradox was just one of many that defined Mitchell's life. Anyone who puts fuel in a tank or turns on a light switch has benefited from Mitchell's efforts. This compelling biography reveals Mitchell as a modern renaissance man who sought to make the world a better, more livable place, a man whose unbounded intellectual curiosity led him to support a wide range of interests in business, science, and philanthropy.

Texas Painters, Sculptors & Graphic Artists John E. Powers, Deborah Daniels Powers, 2000.

Making the Unknown Known Victoria H. Cummins, Light Townsend Cummins, 2024-09-02. In *Making the Unknown Known*, leading scholars throughout Texas explore the significant role women artists played in developing early Texas art from the nineteenth century through the latter part of the twentieth century. The biographies presented here allow readers to compare these women's experiences across time as they negotiated the gendered expectations about artists in society at large and the Texas art community itself. Surveying the contributions women made to the visual arts in the Lone Star state, *Making the Unknown Known* analyzes women's artistic work with respect to geographic and historical connections. Including surveys of the work of artists such as Louise W. Ste. Emma Richardson Cherry, Eleanor Onderdonk, Grace Spaulding John, and others, it offers a groundbreaking assessment of the role women artists have played in interpreting the meaning, history, heritage, and unique character of Texas. It places women artists within the larger social and cultural contexts in which they lived. In that regard, it contains an analysis of their varied styles of art, the media they employed, and the subject matter contained in their art. It thus evaluates the contributions made by women artists to defining the nature of the wider Texas experience as an American region. Beautifully illustrated throughout with rich, full-color reproductions of the works created by the artists, this volume provides an enriched understanding of the important but underappreciated role women artists have played in the development of the fine arts in Texas. At last, the unknown story can be known.
